

2nd day. Tuesday.

We begin the day with the presentation of the natural areas of the five countries:

After this we went on a trip to the natural area of the coast of Lugo, visiting the Playa de las Catedrales, a natural landscape made by the sea for centuries. Here we had time to take photos and enjoy the beautiful beach.

After lunch we went to visit the port of Burela and its bonitero museum ship. In it we could see the traditional fishing art of the boats of the Cantabrian coast.

We also got to know the art of the "redeiras" and its important contribution to the fishing industry.

Without a doubt, this was a fantastic day in which we got to know our colleagues from other countries better, we made new friends and we practiced English.

We believe that our guests were delighted with the trip to the coast and they are discovering a country different from the image they had.
