## How to play

“Xeri” is a card game, it can be played by children from 5 to 105 years old, it is a simple game and is based 50% on luck and 50% on memory.

Individuals: 2, 3, 4 + (Individually or in groups)

Cards: 1 (52 Cards)

The goal is to get the cards down on the table by playing a card whose number is equal to the number of cards on the table or their sum.

Erasmus+

## Sharing the cards

It is played by two players up to 4 years.

One player undertakes to deal and deals six cards to each player, one by one and not all together in order to be mixed all the cards well.

Once the cards distribution to the players is completed, the dealer puts down 4 cards open so that everyone can see and each one is on top of the other.

Erasmus+

## Let's play

The game start with the player to the right of the player who deals and throws first a card.

If his card is the same number with the dealt card or a figure, then he gets all the cards that are down.

A player can also get all the cards when he throws the Jack card

regardless of which card is down and takes them all.

If the player does not have the same card number or the figure to take them all, then he simply throws his card on the existing cards .So the game continues until all the cards of the deck are finished.

Erasmus+

## When do you get a "Xeri" ?

The player makes a "xeri" when there is only one card down and he throws the same number or the figure, each "xeri" corresponds to 10 points . If there is only one Jack card down, and the player throws a Jack card, he makes a "xeri" with a jack card , then this "xeri" counts for 20 points.

## Who wins?

In "xeri" wins the one who has collected the most points .

Points are:

- 10 pt for each "xeri",
- the 4 aces
- all the figures
- the 10 Diamond
- 3 points gets the player who has the most number of cards
