

“Maths everywhere” Erasmus+ 2019-2022

Card games by 1st General Lyceum of Ilion

Erasmus+

# Αγωνία (agonia) Agony

The game is very similar to Uno and is more fun if played by 4 people, however it is also played with 2

Is played with the whole deck (**52 cards**)

## Rules of the game

- The player who has dealt the card deals seven cards to everyone.
- He leaves a card at the bottom and rests the rest of the deck next to it

Erasmus+

Players roll one card at a time based on **color** and **shape**, for example:

if there are **4 hearts** at the bottom

the player must roll any card with heart he wants (  or  )

or can roll a different color and shape which matches with the number 4, like

and the players now continue with the new color and shape (for example 4 diamonds)

If the next player does not have a card to draw, then he draws a card from the deck below, if he still does not, then he says “ pass” , and the next player continues.

Erasmus+

In case the cards of the deck drawn by the players run out (something very common), then we leave the one card that is at the top of the cards that have been collected down, we take the rest, we shuffle them and we use them again.

The goal of each player is to roll all the cards in his hand or get as few points as possible in each hand. Some of the decks have an important role to play.

Erasmus+

**FOLLOW THE RULES**

Number 7. When the player rolls the number 7 he is obliged to roll another gender of the same color and shape, ie 7 never falls alone. The player can roll the 7 and immediately another 7 of another shape and color, just then another number must follow.

Number 9. The player who throws the number 9, forces next player to take two cards as a penalty, the player who takes the two cards, if he does not have to throw, draws again, if he still does not have, he says “pass”, and the next one plays.

Erasmus+

## Who wins

The player who will be first without any cards in his hands wins.

Alternatively, if agreed by the team, and after a set of games, the winner may be the one who has collected the fewest points, ie at the end of each game, each player adds the numbers left with them in their hands, (the figures count for 10 points), the total is each time written on a piece of paper under the player's name, and at the end of the set of games, the numbers are added, and whoever has the fewest points is the winner, regardless of whether someone was first without cards. by the players
