VT4P: VISIBLE TEACHING4PERFORMANCE

"Visible Teaching for Performance" is the name of a three-year Erasmus + Key Action 2 - Strategic Partnership project. Nine European partner schools are trying to meet the challenges the European Commission has in its *Europe 2020* program for the educational systems of the individual European countries.

Over the next 3 years, we will work together and develop ideas on how to improve the efficiency of educational systems. We will examine which factors make the learning process of our students successful, for example, to reduce the proportion of early school leavers and to increase the percentage of university students.

We will work with the meta-study of Professor John Hattie. Inspired by his research, we want to create a school that successfully trains, engages, inspires, prepares for lifelong learning and the teacher sees teaching through the pupil's eyes. We will improve language skills, key skills and create an attitude of openness to cultural diversity. Teachers will develop support plans in selected areas (Empowerment Plans), which along with modern methodological solutions will be proposed for inclusion in the school development plan.
