

## ROOM MODULES

---

We are a big school with round about 1000 pupils. With the beginning of the new school year we got two big room modules with new classrooms on the school yard. There are ten rooms in the two modules. They each have a computer, a digital tablet, a white-board and air-conditioning which ensures pleasant temperatures. The room modules offer more space for teaching and learning but they are also very noisy because of the echo in it.

## Welcome to RSO

---

## Our school

---

We, the „Realschule Ochtrup“ (RSO), are a big school located in a centre with also two different schools. We teach round about 1000 pupils with 75 teachers. The pupils are between 10 and 16 years old.

---

## The break

---

Here in Ochtrup we have got two big breaks in our school day. During the breaks, pupils can go to the kiosk to buy some rolls or on Thursdays you can buy some sweets. And we have got a big school yard with a basketball court, table tennis tables, a climbing wall and some places to sit together with friends.

If you have lessons in the afternoon, there is a long break of 50 minutes where you can leave the school yard if you are at least in 7th grade and if you've got your parent's permission. Breaks at the RSO are cool.

## Technical equipment

---

Our technical equipment at the RSO offers good possibilities for learning and teaching. Every room contains a projector with a screen and a computer. Currently, there are also a few rooms with big television sets. Many teachers are already equipped with iPads and the rest will follow.
