

WASTE MANAGEMENT IN CEFALÙ

ISTITUTO ISTRUZIONE SUPERIORE
IPSSEOA MANDRALISCA

How it is organized

Citizens follow the rules dictated by the municipality.

They deliver the waste in plastic bins - given by the company that manages the waste collection - and expose them outside their homes according to the calendar provided by the Municipality.

In some cases citizens can leave the waste (organic waste, paper, plastic object, glass and aluminium) in the collection points located near the houses or in the condominium ones.

There is also a different method of conferment, in the ecological islands, for users not reachable by the door-to-door service or far from the inhabited center, usually residing in the districts.

There are also transfer methods that differ according to the type of waste produced or the user who produces it. For example: HACCP waste from bars, restaurants, etc. has a different delivery time from domestic users, as well as non-domestic users that produce non-HACCP waste.

- Toner cartridges and printers (only domestic users)

COLLECTION HOURS

6:00 - 8:00

Daily, except public holidays

Bags, sacks or containers for collection must be placed on the road near the house on the indicated days and times. Before collection, paper and cardboard can be tied with string or inserted in containers of the same material.

Offenders will be punished with the sanctions provided by article 255 of the Ministerial Decree 152/06, as well as with the application of sanctions provided by the Municipal Regulations for the regulation of waste disposal services for urban solids

BULKY WASTE

Can be brought to the waste management site of Contrada Caldura, or it may be possible to arrange domestic collection by calling the number

+39 320 400 6136

between 7:00 and 13:00.

Door to door collection

The waste collection service follows a calendar with specific timetables and days described in the brochure. There are different collection islands for the collection of waste, one is open also on Sunday especially in summer when the town population increase.

The percentage of recycling in Cefalù reached 64% last year.

The waste collection calendar for the Municipality of Cefalù

The delivery of waste is divided into six different days. As you can see, perishable waste can be delivered three times a week, while the rest only once.

There is also an assistance number and a useful guide for citizens to correctly dispose of waste and not incur possible penalties.

The waste sorting depot

The municipality of Cefalù has a big depot where citizen can leave under the control of rubbish collectors bulky waste, electronics, wood and cuttings, used oils and non-recyclable waste.

The depot is open only during working days from 8,00 to 13,00 a.m.

Citizen can also call an assistance number to have the bulky waste collected at their home, but they need to fix the day and timetable when they can have this service.

The waste collection at the school “Mandralisca”

The school has garbage containers outside the building for the collection of non-recyclable waste, organic waste, paper, plastic object, glass and aluminium that rubbish tracks collect weekly. In each class, in the hall, the kitchens and laboratories there are the bins for the paper, plastic and non-recyclable waste. The students at the end of the lessons go on the ground floor to empty the bins in the big containers.

The bins have been provided by the company that manages the waste collection thanks to a project called “My green school”.
