

Activity P10. Gardens at school

Ylakiai Gymnasium pupils established a small community business „Watchful EYES“. Pupils prepared a business plan. The goal is to to prepare „green“ products and trade them. There are 6 pupils who are responsible for the business success and the others are „workers“.

As the 8th of March is the International Woman’s Day, the first plants to sell were tulips (present for women). Firstly, we have done a survey at school, if the community bought the tulips and other spring flowers for the present and how much paid. This Project was successful.

Knowing that Easter is coming we decided to prepare Easter table decorations and compose the spring flowers which we have planted earlier. So, we had a workshop „Watchful EYES Easter table decorations from recycled materials“.

We are growing plants and waiting for the customers. This activity helps us to gain life skills: labor, business, healthy lifestyle (we are growing spinach and we will prepare green cocktails for gymnasium community), team work, etc.
