

Rebecca Migliozi: Digital Identity

What Social Networks do I use and I have a personal account on?

Facebook, Twitter, Instagram, Ask, Tumblr, Pinterest, Youtube, Snapchat, We Heart It.

Is something said about me on Social Networks? What of these? What is said about me?

Sometimes I am mentioned on my school website because of school projects and on Facebook by my friends.

I don't know what is exactly said about me, but most of the comments are by my friends and relatives.

Which informations do I share? How many people can see what I post?

I mostly post photos online, some of my thoughts and basic infos.

I share my informations with my friends and friends I have in common with them.

My Instagram pics are viewable by anyone.

How many followers do I have? Where are they from?

It depends on the social network we focus on:

I have more than 1000 friends on Facebook and Instagram, on Facebook they're all friends of mine, Instagram followers are from all around the world instead, because I have a public profile.
