

Innovation starts with Action! STEAM

Project number: 2016 – I – TR01 – KA219 – 034227_7

Development Diary

Emotional Diary

Only mobility students and students involved into Skype conversations as well as webinars use digital and/or real travel diaries in which they describe their experience in travelling and activities during their stay in a partner country. Students can include pictures, movies and presentations by using different applications.

Italian students, who are not involved in the mobilities, take part in this activity describing their experience and feelings about Skype communications and webinars with the other partners, as well as their experience during the TPM in Italy in May 2017.

All the partners will use sway.com to create the diary.

Students will write about their feelings and visions during all their different contacts with the other partners.
