

Europa Trivia Game Rules – Virtual School Exchange with Player vs Player

Goal

To gain points by taking Quizzes so as to self-assess, acquire and develop basic skills and key competences in the following Categories: English Foreign Language, German Foreign Language, French Foreign Language, Spanish language, History and geography, European History, EU institutions, Mathematics, Economy, Music, Art and crafts.

Player vs Player 1:1 Devices

Before starting the Europa Trivia Game, every student needs a device. In order for the teachers to identify the students, they have to use at least their first names and eventually their family names in case of namesakes. In order for the participants to recognize the nationalities of the students, the latter should add the postal abbreviations for country names (e.g. FI FR LT PL SP) before their first names (e.g. FR_Laurence).

How to play

Start the game by alphabetical (e.g. Finland, France, Lithuania, Poland and Spain) and numerical order (i.e. Number 1 - Station Europe). A student from a school throws a dice to reach a Destination; but before reaching the Destination the student of this school has to guess or calculate what distance band separates the two capitals. For example, to start the game from Number 1 - Station Europe in Brussels (Belgium) to the Destination designated by the dice (e.g. Number 4 - Destination Lithuania) or from the last country reached (e.g. Number 4 - Destination Lithuania) to another Destination (e.g. Number 2 - Destination Finland). Since all the students travel altogether across Europe only 1 school item as pawn is necessary to move over a map of Europe to follow their journey.

Europa Trivia Game Rules – Virtual School Exchange with Player vs Player

If a student from a school guesses it right he/she chooses a Quiz available and related to the Destination in order to compete with the other students and gain Open Badges. If the student does not guess the distance band right the teachers choose a Challenge that can be performed online to the student who failed in guessing the distance band. If the latter executes the Challenge successfully he/she is allowed to choose a Quiz available and related to the Destination and wins Open Badges. If the latter does not manage to execute the Challenge successfully he/she gives his/her turn to another student from another school by alphabetical order. If any student from every country does not manage to execute the Challenge successfully the teachers choose the Quiz for the Destination reached. If the Number of the Destination is the same as before the student can choose to play a Quiz or a Challenge. With the results of the Quiz the student in first place on the podium wins Open Badges and has the privilege to throw the dice for travelling to another Destination. After several rounds if no more Quizzes are available the student has to perform a Challenge successfully to get the right to throw the dice again.

NOTE: A student cannot choose and play the Quizzes made on his/her own countries. The Quizzes and Challenges played cannot be chosen a second time. Native speakers in English, French, German and Spanish cannot play the Quizzes for these languages.

Distance bands

Before reaching a destination the students have to guess or calculate what distance band separates the two capital cities.

The distance bands to choose from are:

10 and 99 KM

between 100 and 499 KM

between 500 and 1999 KM

between 2000 and 2999 KM

between 3000 and 3999 KM

between 4000 and 7999 KM

8000 KM or more.

Quizzes per Category

When students reach a destination they have to choose from a set of Quizzes to compete with the other teams and to gain points so as to self-assess, acquire and develop their basic skills and key competences in the following Categories.

Number 1 - Destination Station Europe

European History Quizzes
European Institutions Quizzes
Mini Europe Quizzes

Number 2 - Destination Poland

Poland
English Foreign Language
German Foreign Language
French Foreign Language
Spanish Foreign Language
History and Geography
Economy
Art and Craft
Music
Mathematics

Number 3 - Destination Finland

Finland

English Foreign Language
French Foreign Language
German Foreign Language
Spanish Foreign Language
History and Geography
Art and Craft
Music
Mathematics

Number 4 - Destination Lithuania

Lithuania
English Foreign Language
German Foreign Language
French Foreign Language
Spanish Foreign Language
History and Geography
Economy
Art and Craft
