

Europa Trivia Game – School Exchange

Goal

To gain Open Badges by taking Quizzes and Challenges so as to self-assess, acquire and develop basic skills and 8 key competences in the following Categories: English Foreign Language, German Foreign Language, French Foreign Language, Spanish language, History and geography, European History, EU institutions, Mathematics, Economy, Music, Art and crafts.

Team Building

Before and/or during the School Exchange, the students form their groups and choose a team name with the Team Building worksheet.

How to play

Once the teams introduced themselves by using the ETG Team Building School Exchanges worksheet the teachers choose the order of the teams for throwing a dice. A student of a team throws a dice to reach a Destination; but before reaching the Destination the students of this team have to guess or calculate what distance band separates the two capitals. For example, to start the game from Number 1 - Station Europe in Brussels (Belgium) to the Destination designated by the dice (e.g. Number 4 - Destination Lithuania) or from the last country reached (e.g. Number 4 - Destination Lithuania) to another Destination (e.g. Number 2 - Destination Finland). Since the teams travel in different groups across Europe remember the last Destination they reached if you organize different sessions during the School Exchange.

If the teammates guess it right the teammates choose a Quiz available and related to the Destination in order to compete with the other teams and gain Open Badges. If the teammates do not guess the distance band right

Europa Trivia Game – School Exchange

the teachers choose a Challenge that can be performed with the equipment available to the teammates who failed in guessing the distance band. If the latter execute the Challenge successfully they are allowed to choose a Quiz available and related to the Destination and win Open Badges. If the latter do not manage to execute the Challenge successfully the team gives their turn to another team. If any team does not manage to execute the Challenge successfully the teachers choose the Quiz for the Destination reached. If the Number of the Destination is the same as before the teammates can choose to play a Quiz or a Challenge. With the results of the Quiz the team in first place on the podium wins Open Badges and has the privilege to throw the dice for travelling to another Destination. After several rounds if no more Quizzes are available the teammates have to perform a Challenge successfully to get the right to throw the dice again.

NOTE: The Quizzes and Challenges played cannot be chosen a second time. Teammates cannot play the Quizzes made on their own countries. Native speakers in English, French, German and Spanish cannot play the Quizzes for these languages. If they are part of a team they will have to stand away from their teams during the Quizzes.

Europa Trivia Game – School Exchange

Distance bands

Before reaching a destination the students have to guess or calculate what distance band separates the two capital cities.

The distance bands to choose from are:

10 and 99 KM

between 100 and 499 KM

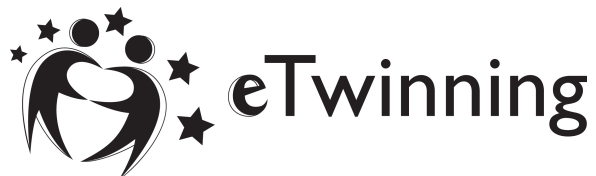

between 500 and 1999 KM

between 2000 and 2999 KM

between 3000 and 3999 KM

between 4000 and 7999 KM

8000 KM or more.
