# HUMANITY, DO NOT FALL ASLEEP!

Our play consists of three acts. The purpose of this scenic representation is to awaken human consciousness in relationship to the global pollution problem. The attitude of being grateful for the clean air we breathe and of protecting the environment must be taught and learnt and practised.

The change starts with *each of us*. We live in a careless world where the change is expected to come from **outside** without understanding clearly that everything starts from the **inside**.

Without realizing that **WE** – ordinary people – are actively participating in the destruction of our planet, we make forceful, violent efforts to damage it. Everyone has a contribution to this progressive massacre. Even being indifferent to this problem, *you* contribute to the devastation of the Earth.

When the little ones say: "*Please, tell us the story of "the lost paradise" called EARTH*" how could you convince them that MAN is a rational being?
When your children ask you: "*What happened to our Earth*? *"Why did IT die?"* how could **YOU** explain the reasoning to them?

**Nature** has become a tourist destination, a place we occasionally or rarely visit. We are looking forward to going on holidays or to spending a weekend far from the hustle and bustle of the city. We can't wait for a "mouthful" of clean air.

At this speed of unconsciousness, we will come to live the day when breathing clean air will have to be paid for or an artificial picture of what the beauty of nature meant once will be displayed in exchange of a large sum of money.

So, there is no time to sleep. **Do something to save the EARTH!**
