

# The Roman Ampitheatre in Siracuse

# History

The anfiteatro built in Syracuse during the Roman period(it was probably started during the reign of Nero) is the largest in Sicilia.

# Use of the structure in the past

The structure was use for gladiator and animal flight, while the nearby theater was reserved for proper theatrical presentations.

# Structure

At The centro of arena a rectangular excavation (covered,in acient times)contained equipment used for perfomances.

Within the Roman Ampitheatre of Syracuse, visitors can only walk along the top ring (with the exception of the stairs and the arena)
