Thanks to Erasmus project our school community worked together

This project was very rewarding on several points.

- 1) Improve the communication in english for everyone
- 2) Give students opportunities to discover different way of life in europe and new way of teaching.
- 3) Make students working in a group with the other partners on different activities.

During the project students have realized that there is an obligation to think on new lifestyle if we want to save and preserve our planet when they have to think about the city of tomorrow.

They became aware of the urgency to participate at the reducing of the global warming.

It was very kind to share with new european colleagues new forms of teaching. Even if the project has been delayed by the covid situation we ended it this year. Certainly i will try to participate in new project very soon.

Knowledge when you are young, improvement and action when you become an adult

Collaborating with colleagues and studens from other countries is always a fascinating and rewarding experience.

This was an enriching and fulfilling project in Greece. Our hosts, the Greek teachers and headmaster of the institute have been very welcoming and have done their best to show us the best of Greek culture and nature.

This trip was a blessing! We have had a chance to work and exchange good practices with our colleagues! It has been professionnaly enriching !

The projet activities are very interesting

It was an important experience.

It was great discovering new people.

It was great discovering new people and cultures thanks to this project and bring students work together and improve their communication skills
