Develop activities around the purpose let's build the city of our future

Development of an interaction map, organisation of students' meetings

I helped our students preparing their presentations in order to introduce our city. I also participated in the trip to Paris.

After that, I worked on the evaluation of the Erasmus project. I also worked on the dissemination activities of the project.

Think about how the city will be structured in renewable energy

Interviews, seminar, research, videos

One project very interesting in order to improve the english language and allow students to discover other forms of education and lifestyles.

Participation in Erasmus projects helps students develop their sense of being part of a European community

In the difficult situation caused by the pandemic, it is really encouraging to think that we don't stop our activities.

I'm involved in the project because I want to improve my english

I will definitely participate in a next Erasmus project

Hope we will soon have the chance to continue our inspiring project and make our students dreams come true!

Thank you!
