MY VOKI

HOUSE

I live in a detached house located in the middle of l'Esquirol. My house has got two floors: on the first floor there's a garage, one bathroom, my grandfather's office, and a larder. If we go upstairs we can find the second floor's hall, a big kitchen and the living room. Also, there are four bedrooms, another bathroom and one toilet. There are two spare rooms, one is the washing room and the other is the one we use for ironing. There's also one office to study and work for me and my mother. On the façade of my house there's a long balcony that goes from one side to the other.

Moreover, there is a small garden which is full of stones and there's a big tree, too. On the right side of it, my grandmother grows up her flowers.

What I like most about my house is my bedroom, because it's very illuminated and I sleep with my sister on a bunkbed.
