

Hobbies

I draw, sing, play guitar and piano.

I started to play guitar four years ago. Playing guitar is really easy.

I have played piano almost eight years.

I started to draw the first time when I was 10 but then I stopped. I started again in year 2014 and since then I have drawn almost every day.

Singing is really important to me. I started to sing on my own when I was 10 years old.

My family

I have nine siblings. Five sisters and four brothers. I'm the youngest one in our family.

Mom works as a practical nurse and dad is engineer. Three of my sisters have kids.

House

I live in a detached house with my brother, mom and dad. I like the place where we live. It's quiet in there. Our home is not really big but big enough to live in it.

This is me
