MY HOUSE

This is my house! It is situated in a quiet street in my town, I love the peace of the place.

I live in a house a little bit peculiar, but I love it. It has got two floors. On the first floor, there is a garage and next to it there is a big studio, which

I personally love, and a bathroom. There is a terrace too. Then, if you go downstairs, to the basement, you find a huge living-dining room and a kitchen. There is a corridor with four bedrooms, a bathroom and a washing room. There is also a garden with a BBQ and a pond with little fish. On the third floor, there is a kind of box room and then there is a big terrace with five solar panels. What I like the most about my house is the garden because in summer we can dinner outside and watch the sunset.
