1	The workshop and the project are here to fight against discrimination.
2	Good - It helped us to work using different methods but some workshops aren't that applicable in real life.
3	Because this project was incredible and I will do that again without hesitation with same people
4	Because everything was good when I was in Germany and everybody was so cool.
5	Most work at School were organisation stuff
6	I believe that the fact I had the chance to meet people from all over Europe and discuss matters of our society with them made the whole procedure excellent
7	I indicated "excellent" on every question because everything was perfect and I was able to communicate very good with my host and his family as well as with the other students that participated in the program. As for the workshops, the teachers were very good and we followed their instructions so everything was fine. I think that it was a great experience.
8	The goal we were trying to achieve was the same both at the workshop and at the project at my home school. In both cases we were trying to figure out which social groups are being discriminated every day and to find solutions to this problem.
9	both of them had the same goal, to recognize the full meaning of discrimination, so later be able to prevent or to decrease it. Also they were very similar and the results good enough
10	Generally, we met new people, we made friendships, we learned new things and we gain unforgettable experiences
11	The reason I chose excellent is because the project we did at school has the same goal and discusses similar issues with those we addressed during the workshop in Kamenz.
12	Everything was great.
13	It was all interesting and instructive.
14	I chose to answer with excellent in the previous question because in the last workshop we learned important knowledge for our project but also began to plan it
16	I voted excellent mostly because it was a lot of fun.
18	Because our English skills were perfectly educated for a situation like this.
19	the workshop and the trip were well prepared
20	All of it was interesting and fun
21	Because that are very similar things.
22	Because it's all good and it's so amazing that we can connect with people all around the world
23	it's my opinion
24	Because I like trip to Germany very much and I love people which I met there. It was nice to talk to everyone and find out what they think about some European problems.
25	well to be excellent (almost) everything has to be perfect, while with good there can also be some little "mistakes". Average is more of a "it's okay" and below average is actually really bad for me.
26	I prepared myself for 2 years and the workshop was clear and the trainers were helpful when I had doubts

1	We will organize meetings with refugees to help them and include them more in our school. We will organize French lesson too.
2	I think that I'll have to do a presentation to my class and some others classes too. I'll show them the workshops and why was it nice to have a several point of views given the different cultures and origins of the group.
3	By explaining everything that happened during this week in Germany, showing the importance of this project, trying to bring people together because this trip also allowed me to realize how much human relations are important, even if we've just met people previously unknown, we quickly get attached to it and we don't want to leave
4	It's depend with others students of my school we will place something in our school.
5	We will prepare the Workshop like the others before us
6	I would like to organize some kind of assembly at our school, in order to discuss with my classmates, listen to their opinions about the same topics and compare them to the opinions of the students that took part in Erasmus+
7	We have already done most of the work here in our country and we already talked with our classmates and teachers about our experience with the program and what we learned. So we showed them what we learned and we still continue doing this.
8	The project that we were assigned to accomplish is to go through the space our school provides us and check the possible sources of discrimination there. After that we could suggest some changes to our school principal and our teachers and explain to them why these specific changes are needed so that our school is able to function properly and fair for everybody. We will use the things we learned at the workshop to elaborate on the reasons why we need to improve our school.
9	with my team try to organize as well as we can the same game with did in Kamenz, in which we searched the whole school in groups for evidence of discrimination. we think this was the best part of our experience back in Kamenz, beacause we felt more active. The problem is that in our school we won't be able to make mixed groups. In Kamenz, this game helped all the participants to communicate with each other and get known better of the others, so the rest of our experience could be even better
10	We will recommend solutions to our teachers to improve our school.
11	We aim to make some proposals to our teachers regarding the problems we spotted around our school and collaborate with them in order to find suitable and efficient solutions.
12	with some activities that we done there
13	With much confidence.
14	by making a presentation about the learned knowledge
16	I told the others a lot about our Workshops.
18	Maybe we could present them in an extra-lesson or at a hearing in the lecture hall.
19	By activities in our school for example: do a breakfast with the migrants of our school and prepare a classes for them (after we will find I hope other ideas to integrate them)
20	With games and models
21	I am planning make a homework and present it to other students and teachers in my school.
22	Like I was being taught
23	Workshop in my class
24	We can do some of projects that we were doing in Germany and ahow them the importance of solving some of the problems threw the presentations and asking them for their opinion.
25	I'd like to do it like we learned it, so maybe through some of the activities and not only through a kinda boring presentation
26	by giving lessons of French to the Migrants (minor , isolated) in my school and playing team building activities

1	The Erasmus + program is really important to open our mind and to meet differents cultures.
2	It was a bit short, so you could add some extra-hours.
3	Never change, they are so cool, perfect very friendly and I love them
4	Not really because everything was cool when we were all together.
5	I would like to have a Feedback of the Trainers after each exercise. What was is good for? Why did we do it? What should we learn about?...
6	Keep up the good work you do and try to involve as many students as you can in this great program!
7	I really had an amazing time and I think that everything was great so I don't have any advice. I am really happy for participating on the Erasmus+ program.
8	No, I think everything went perfect!
9	well i know that every erasmus program has a specific subject, but i think that we could participate in more games in which we woud get the chance to meet the other culture and the rest of the participants even better
10	Everything was perfect
11	Not really, the program is well-organized and I had a great time participating in it.
12	I don't, everything was great.
13	No.
14	No, I think the workshop was really good and I can not think of ways to improve it
16	no
18	No, in my opinion it was very interesting and fun to come every day back in school to those workshops. Nice work :D
19	No, I don't have any advice for you
20	Keep up the good work
21	everything was excellent.
22	All is super good
23	No
24	In my opinion you just have to keep working like you previously had.
25	it was a really nice experience, but it's somehow sad, that it's already over. So maybe make the projects longer? or make the Visits of the students longer than only one week.
26	It was good to have good teachers and good trainers to advise and guide us
