

PRINCIPLES OF GOOD PRACTICE

All the documents, pieces of news, announcements, etc., that appear on the Trimedia Platform should be written in English, notwithstanding the possibility of these contents being translated into the native language of every participating country.

The audios of the videos should be edited, preferably, in English. Videos produced in languages other than English should be subtitled in English. Teachers will be in charge of guaranteeing the correction in the use of the English language.

The copyright of third parties will be respected, so no songs or images protected by copyright will be used in the audiovisual productions.

The contents of the images will be of an educative and entertaining nature, and in no case will they reference violent or sexual contents, or any other sensitive or inappropriate contents for the users of the platform.

The social media which appear on Trimedia will be moderated by the responsible members of the project, so no user comments will be published without the supervision of the person in charge.
