

Christmas story
By Melinda Krasimirova 4th grade

One night I woke up and heard someone knocking on the window. I went to him and saw Santa Claus with the reindeer on the sleigh.

"Hello, Yani!" Jump in the sleigh! Santa said cheerfully.

I got in the sleigh and she headed for Lapland. As we flew over it, I watched and wondered what it was like to have snow all year round. It was so beautiful that I wanted to photograph it.

We went down from the sleigh to Santa's workshop. We went in to see what - the elves are packing presents, singing songs and making toys. It was so interesting. I decided to help them. I put on an elven suit and lined up next to an elf. I don't know how I wrapped my gift. Although I know what it is, I will not betray you.

Then we went to the deer. They were very sweet. I stopped at Rudolph. Santa allowed me to feed and meet him. Rudolph handed over his sweet red nose, which shone like a lamp. When I touched it, my hand lit up.

"Santa, can I ride Rudolph?" I asked.

- Yes! Of course! He replied in a cheerful voice.

I climbed the deer and flew into the sky.

"Rudolph, you are very clever!" Thanks for letting me ride you. I told him happily.

"No need, Yani!" You are a child who believes in Santa Claus! And a child who believes in magic is welcome to me! The deer spoke to me. - This year you will receive not only the gift you wrapped, but also a gift from me!

- I'm happy that I saw you! Can you take me home? Rudolph asked.

- Yes! Hold on tight! Let's fly with full force!

After the long journey I returned home. Before I entered, the deer said to me:

"Please don't tell this story to anyone!" This should be kept secret so that other children do not think they have been bad.

I nodded and jumped to bed. As soon as I looked out the window, I saw that Rudolph was gone. I fell asleep with the thought of keeping the promise I made.

In the morning under the Christmas tree I found what I wanted and also a gift from Rudolph. No one has heard of this story.

Remember, if you believe everything is possible.
