# LET'S REVIVE TRADITIONAL GAMES!

WHY GOING BACK?

- Computers, smartphones and tablets are omnipresent in the world. Of course, they have many benefits: instant communication, access to unlimited information, etc. However, they also bring serious threats to our mental and physical health: **social isolation, obesity or even addiction.**

- **Traditional games that our parents used to play were a great way of losing weight, build social bonds and improving our coordination.**

- **Let's go back to our childhood (or our parents') to rescue popular games like 'hide and seek' or 'marbles'. They are for free but their benefits are real.**

THE TASK

- 1. Discuss which were your favourite (physical) recreational games when you were little. The ones you used to play in parks and streets before you got definitely hooked on your phones. Ask your parents if necessary.

- **2. Do you think these games have become old-fashioned, why don't you enhance them? Create a new set of rules. What should 'hide and seek' be like in the 21st century?**

- **3. Choose TWO games and create video-tutorials to explain future generations how to play them:**

- **- Write down the rules and a script for your video tutorial.**

- **- If necessary, draw a storyboard.**

- **- Record the shots for your tutorial and cut the videos. You can cut them with CANVA VIDEO EDITOR.**
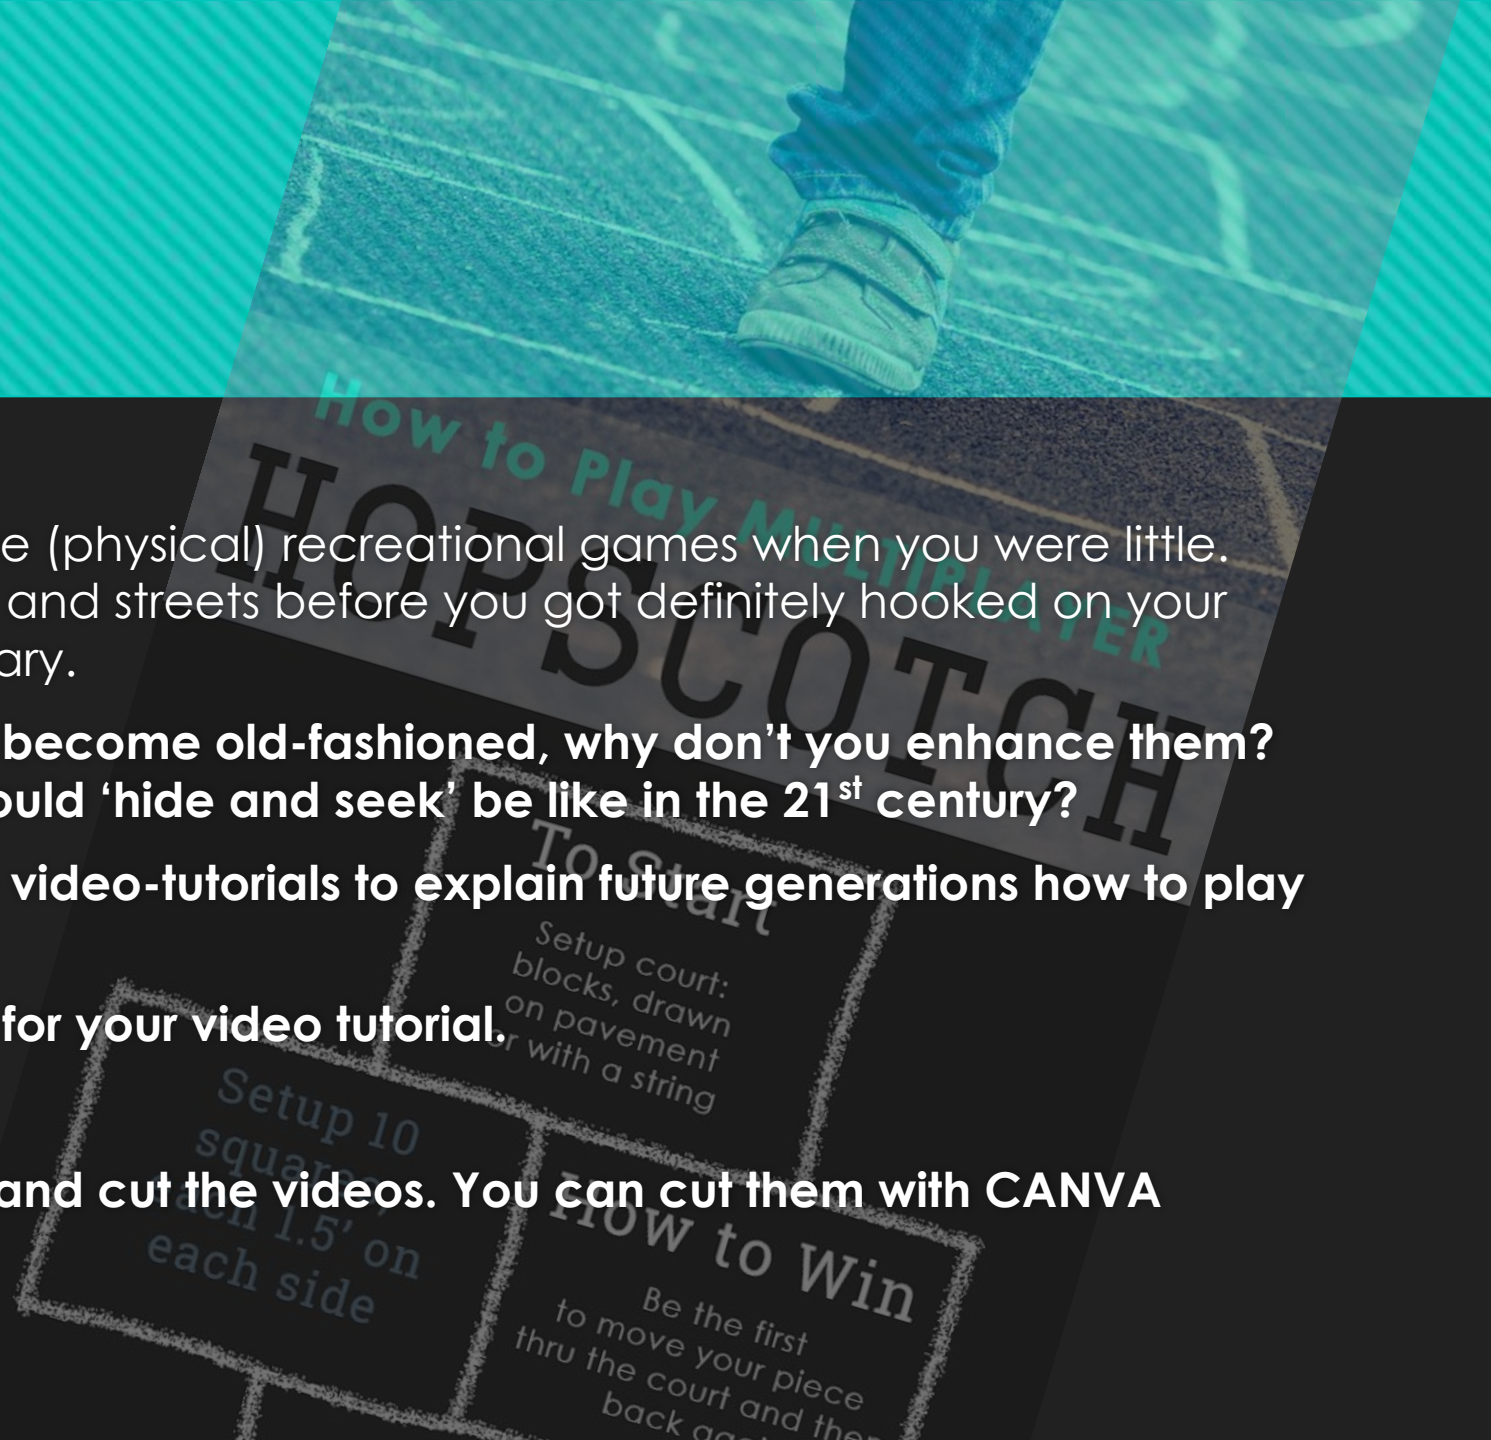

THE TASK

GRAMMAR: present simple, imperative, modal verbs.

VOCABULARY: verbs of movement.
