

Bodymeter sustainability concept

Our Sustainable concept

This concept, explain our sustainability concept. Our company produces temperature meters and a lot of other companies use bad batteries, but not us, we just use rechargeable battery packs for the environmental Protection. Also we don't use plastic, we just use recyclable materials.

Sustainable leadership

We as company, offer our employees **free childcare** and you have the **right to make decisions**

What is a sustainable world for us?

For us a sustainable world, don't use plastic or internal combustion engines

What did we do for the sustainable world?

We just use **ecologically degradable packing material**. Also we just have **electrical company vehicles**
