

Description

The company was founded to find solutions to the problems created by Covid 19. However, billions of masks thrown away everywhere are very damaging to the environment. The danger for future generations is growing. That's why we as a team decided to produce reusable, environmentally friendly masks.

Our Mission:

- Reduce COVID-19 infection and other viral or bacterial diseases
- Positive impact on the environment.
- Possibility to use the mask repeatedly.

Our Vision:

- Be the largest company in our field.
- Be a part of companies that protects the environment.
- We want people who put on the masks to realise that they are also responsible for the waste

Goals:

- Make the company's name visible in the world.
- Get into the subconscious of all people.
- Make people think about our nature-friendly masks.
- Development and education of our employees in the field of recycling and environmental protection.
- Reduce the environmental damage caused by the use of masks.
