

During this week I had an amazing experience due to having the change to get to know a lot of new people, new customers and get the change to know a little bit more about every different things about Italy, Cyprus, Lithuania and Spain.

This time that we spend together was great not only to improve my English skills as we had to communicate with people that spoke different languages at the same time and everybody should be able to understand.

Also it was excellent, because I could make new friends, that I hope to maintain contact with and to go there same time and be with them.

I would totally recommend everybody, if they could, to get in this kind of projects that give us the chance to get more knowledge about the cultural, habits, traditional dances, dishes, music..., and also to understand that we all can get along well, even though we have some differences.
