

My week in ERASMUS EUROSTAR

My week in ERASMUS was great. One of the best aspects of this week was that I got to improve my English skills by communicating with other people and by the whole environment of English speakers around me.

I had a lot of fun this week. I got to know some students from other countries and thanks to that now I have a new perspective of other countries and other cultures. I think that it encouraged me to be more communicative and not be afraid to speak even if I'm not sure if I'm speaking correctly.

The trips that we had during this week allowed me to get to know better my city and enjoy living here. Even though I live in Porto, there were some places that I never had the chance to visit before, which makes me happy because thanks to the project I could visit it.

I think this was an amazing opportunity and I believe that everyone should have it once in their lifetime.
