

In this picture we can see Roc, Joel, Magalí, Mario and me, Gerard, who I am the one in the middle. The picture's about the presentation of our region. I have chosen it because in my opinion it was one of the most important parts of the project to show and introduce the region of Osona to all the Erasmus students and teachers from abroad. I also have to say that despite being so nervous about talking in front of them all, it was an honor telling and making people know the good points of my region.
