

The week from the 26th to the 30th of April was an amazing one. Our school hosted some students of the countries that participated in our Erasmus: Spain, Portugal, Cyprus and Lithuania. I met new people that made the week one of the greatest in my life. Thanks to this experience I had the opportunity to learn about different cultures and different lifestyles. Our Erasmus is centred on sustainable tourism and during this week we visited some places that believe in sustainability like the little town of Sant'angelo Muxaro or the Farm Cultural Park in Favara. We did all that was possible to make the students from the other countries happy and comfortable in our Sicily. It was amazing to host them and make new friendships around the world.
