

The 4° mobility in Sicily was special. I discovered some places I had never visited before as Sant'Angelo Muxaro and some particular areas of Palermo. Presenting a part of the hard work we did in this last 3 years was very satisfying and made me proud of the product we have created. I met fantastic people, creating new friendships. I improved my English and my Spanish and I had fun by teaching foreign students some Sicilian proverbs.

This mobility gave me unforgettable memories, confirming my thoughts: everybody should do the Erasmus experience because it enriches the person you are, both in a cultural and in a psychological way.
