

*One of the places of Cyprus that I will always remember is Hantara Water Falls. After walking in the middle of nature up to the top of the mountain we arrived to this wonderful water fall where you could breathe a completely clean and fresh air. This place impressed me very much both for its beauty and wildness. It gave me a sense of peace and tranquility that left me speechless, and I know that I will always carry Cyprus and its amazing landscapes in my heart.*

*Furthermore, thanks to this experience I got in contact with other cultures and I had the opportunity to compare my customs with theirs, I made good friends with many students and we are still in contact despite the distance that separates us. If I had the chance, I would go back to those beautiful places immediately!*

*This experience helped me to mature and to relate with very different people, and what's more, it helped me improve my fluency in English, which I feel it's much better than before.*

*I am glad to have participated in this project, it will always be in my heart.*
