Hi dear Ivana

How are you? And how is the situation in your country?

I will update you on what we discussed yesterday in the meeting with the partner schools (17.00/18.30).

- We talked about how is the situation about Covid is in different countries. Germany is still online with the school, Austria will go back soon to school and also Bulgaria. A lot of activities were late because of the lockdown and the impossibility to finish them

- we reviewed the activities that had to be completed in the first part of the school year and those in the second quarter. We manage to finish most of them and we are very happy not to have to postpone them in the next year

- the headmaster of my school was also present, we reflected on the possibility of organizing virtual mobility next year. We will certainly ask for an extension of the project by one year, but in any case we still have 5 mobilities to do, which are many. Here everyone has told his opinion: everyone would prefer mobility in the presence, but we will evaluate in September how the Covid situation is and above all the fear / anxiety of families. It would make no sense to propose mobility if the families do not send the children.

- we decide that each country should take contact with its own national agency to see what it proposes, so we will continue the reflection in the next meeting scheduled for **June 22 at 6pm cet (just an half hour to make this reflection and wish us a good summer)**

- I proposed training on the Mobility tool platform but it emerged that each partner has done training in recent months promoted by national agencies, so it is not necessary to do it I think

I told you everything

If not, I will write you soon!

Elena

PS. I've seen that in the report I didn't write the date of the next meeting.... I told it to you in our meeting, didn't I?
