

SAVE THE EARTH

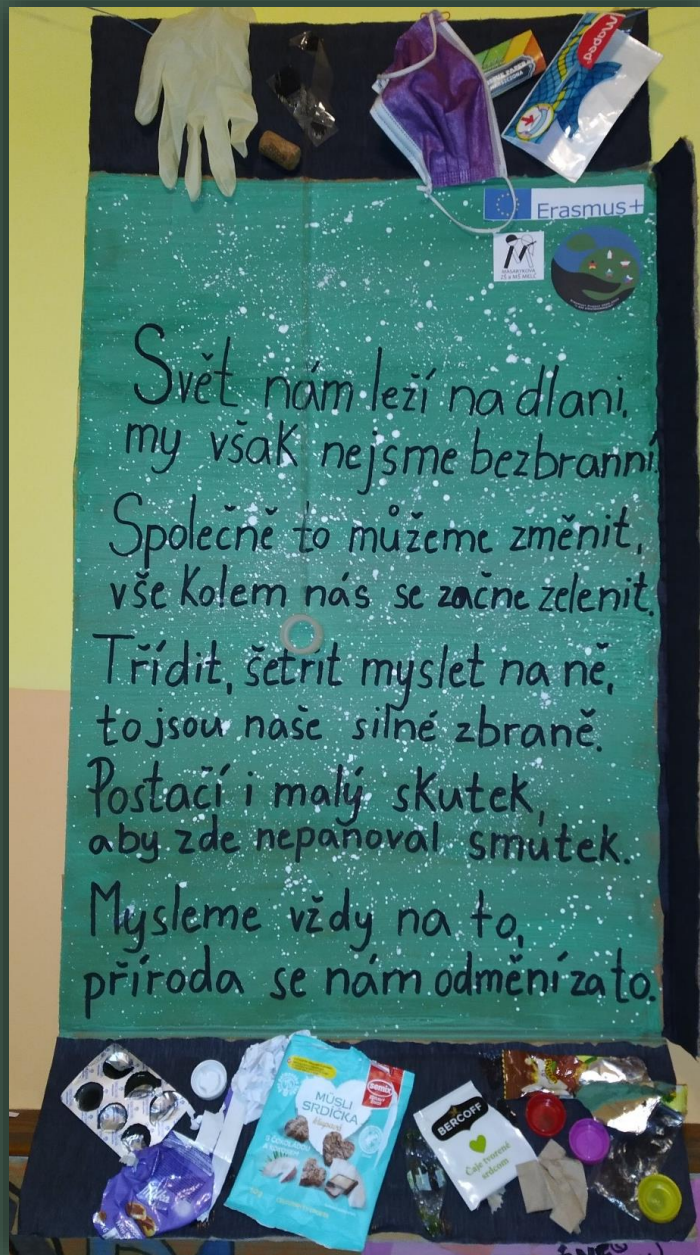

CZECH REPUBLIC

We all know that Earth is the only known planet in this universe where we get all the necessary requisites of life. But healthy survival is possible for years and years only when we maintain the original condition of the Earth. Our healthy survival is safe and secure in the future when we care and love our Earth.

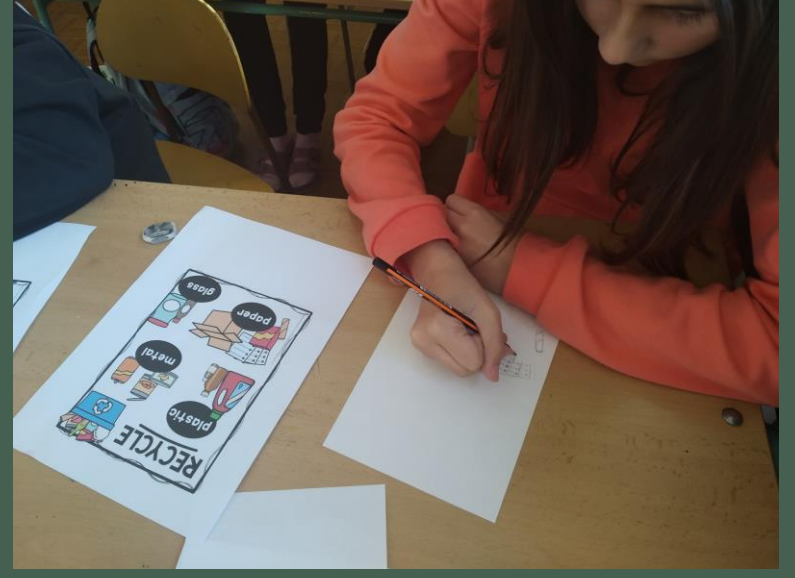

Without Earth, no one will take birth

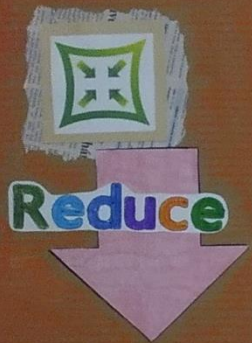

Pupils actively work in the field of environmental education during the school year. The striking poem written by a pupil of our school was made into a poster, and encourages everyone to treat our planet with care. Some other students prepared an informative poster encouraging others to recycle. The posters were presented to the school's pupils and are displayed on the school premises.

We need to do nothing more in order to maintain the greenery of the Earth. We just need to plant more trees, stop cutting trees, and reduce the pollution level. As we call our Earth our mother, who only gives us and nothing takes back, we should understand our responsibility towards our mother and do all possible efforts to make it clean and natural.

Because of the advancement in the lifestyle, industrialization, and deforestation; the condition of the Earth is deteriorating day by day very fast. It is being full of pollution, global warming, and greenhouse gases. There is an urgent need to save our earth because it is the only planet where we can live.

No Earth, No Life!
