

What Do You Think?

WATER IS A PART OF OUR LIVES EVERY DAY. HOW IS WATER A PART OF YOUR LIFE?

We use water for drinking, cleaning, cooking, travel, and many other things. But we also use it for fun. What fun things do you do with water? Do you like to walk in the rain? Do you swim at a beautiful beach? Or do you and your friends like to go to a swimming pool or a water park? Maybe you like to go on vacation near a pretty river or lake.

Scuba diving

Or maybe you prefer water in solid form. Many people enjoy playing in snow and ice. For example, do you go skiing in the winter? Do you like to walk outside on a quiet, snowy evening? Do you make a snowman on a snowy day? Ice skating is fun, too. Can you skate? If you can't, do you want to learn?

What water activities do you want to try? Scuba diving in the Caribbean? Waterskiing in a lake? Skiing down a mountain?
