塑膠袋→有用的東西

Plastic bag → useful things

寶特瓶→黏膠

plastic bottles → adhesive

千萬個寶特瓶→跑鞋
so many plastic bottles→running shoes

5. DIY of marine debris

我們人類丟了很多垃圾到海裡，現在我們去淨灘，回收可回收垃圾，沖洗之後，可以把垃圾熔成塑膠原料，然後再重新製造成另一種物品，不僅環保愛地球，還可以做出實用的東西。

We humans had to throw away garbage into the sea. Now we go to clean beaches, recycle the garbage, and after washing, we can melt the garbage into plastic materials, and then re-manufacture it into another kind of thing, not only environmentally friendly but also practical things.

Wish you all the best,
Freddy, Emma, Eric, Ingrid, Sunny

浮球DIY (蝶古巴特方法)-----1

在海邊，我們經常看到各式各樣的浮球在海洋、海灘上。為了環保，我們可以把它做成裝飾用的藝術品。這次我們要用蝶古巴特法來裝飾**用有圖案的餐巾貼在物品上**。

首先，選一個自己喜歡的浮球形狀，然後拿你喜歡的餐巾，剪下你要的地方，再用A膠將圖案貼上浮球，或者有些部分你可以用畫的。喔，千萬別忘了吹乾之後，再用B膠塗整個浮球，這是為了防水用，結束這些步子就完成了。

我覺得有點困難，因為不管是上膠或拼貼都要先想好，有時候用A/B膠還會黏到圖案，導至圖案撕破。但是做這個浮球是要提醒我們不要亂丟東西，希望我們能為地球盡一份心力。

The Decoupage DIY of Fishing float ball

At the seaside, we often see various floating balls on the ocean or beach. In order for environmental protection, we can make it into a decoration. This time we will use the method of Decoupage to decorate it. It is the art of decorating an object by gluing colored paper cutouts onto it in combination with special paint effects.

First, choose a shape that you like, then take the colorful napkin you like, use Decoupage A glue to put on the floating ball, or some parts you can paint it with oil color directly, but you have to blow dry first, then paint the whole float ball with glue B, because it can make it waterproof, then it's done.

I think it's difficult for me , because have to paint it very carefully.

But to do DIY of fishing float ball is to remind us not to throw things away, I hope we can do our part for the earth.

↓↓↓第一步先塗A膠↓↓↓

Step1 : Paint A glue

第二步剪下你喜歡的餐巾紙

Step2 : Taking the colorful napkin you like

第三步塗上B膠

Step3 : Painting the whole float ball with glue B

第四步用吹風機吹一吹

Step4 : Using the hair dryer

⇩⇩⇩最後綁繩子就完成啦⇩⇩⇩

Step5 : Tie the rope

海玻璃DIY -----2

- 有一種又漂亮，但卻又是可能傷害人的垃圾，就叫做'海玻璃'，從日本開始會去沙灘撿海玻璃，覺得很漂亮，但這也是人類亂丟垃圾、汙染海洋的垃圾之一，所以這樣也算是減少垃圾的好行為；撿了之後，我們可以拿彩色軟鐵絲綁在海玻璃上，然後把小扣環勾上，就完成了一個很漂亮的藝術品。

- 順帶一提，海玻璃要先磨過，否則小心刮傷。

The DIY of Sea glass

- There is beautiful but terrible garbage, called 'sea glass'. Japanese will go to the beach and collect sea glass. They thought it is very beautiful, but this is also one of the garbage that humans throw away litter and pollute the ocean, so collecting sea glasses is a good way to protect the sea. It is a good behavior to reduce garbage; after smashing, we can tie a colorful iron-rope on the sea glass, and then hook the line to complete a very beautiful artwork.

PS: We made those sea glass after clean up beach at Heping Island.

請問你們喜歡浮球或是海玻璃DIY?

我喜歡海玻璃DIY，又簡單又漂亮。

- ❖ How about DIY of fishing float ball and sea glass ?
Which one do you like ?
- ❖ Most of us prefer making sea glass, it's more easy
for us and beautiful.
