

## Building the survey

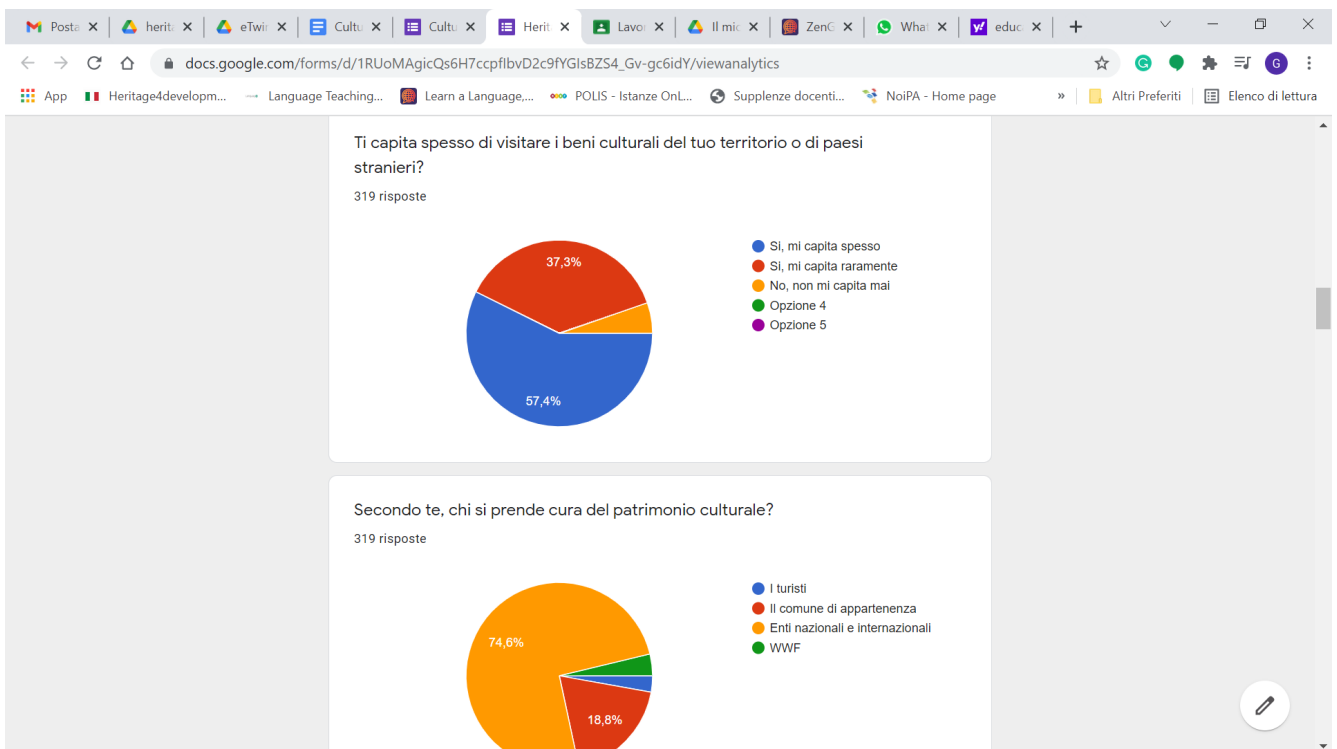

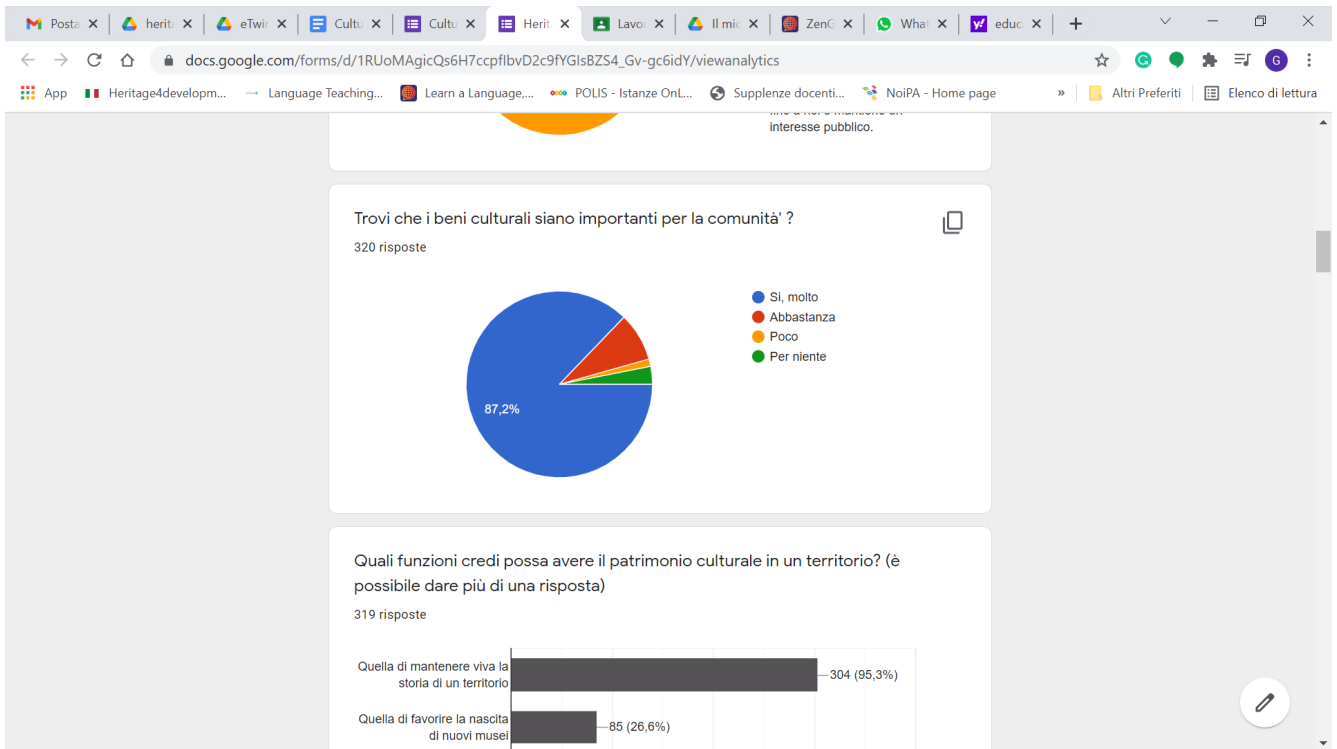

In March, during the Art History and citizenship lessons, one First grade class reflected on the idea of Cultural Heritage.

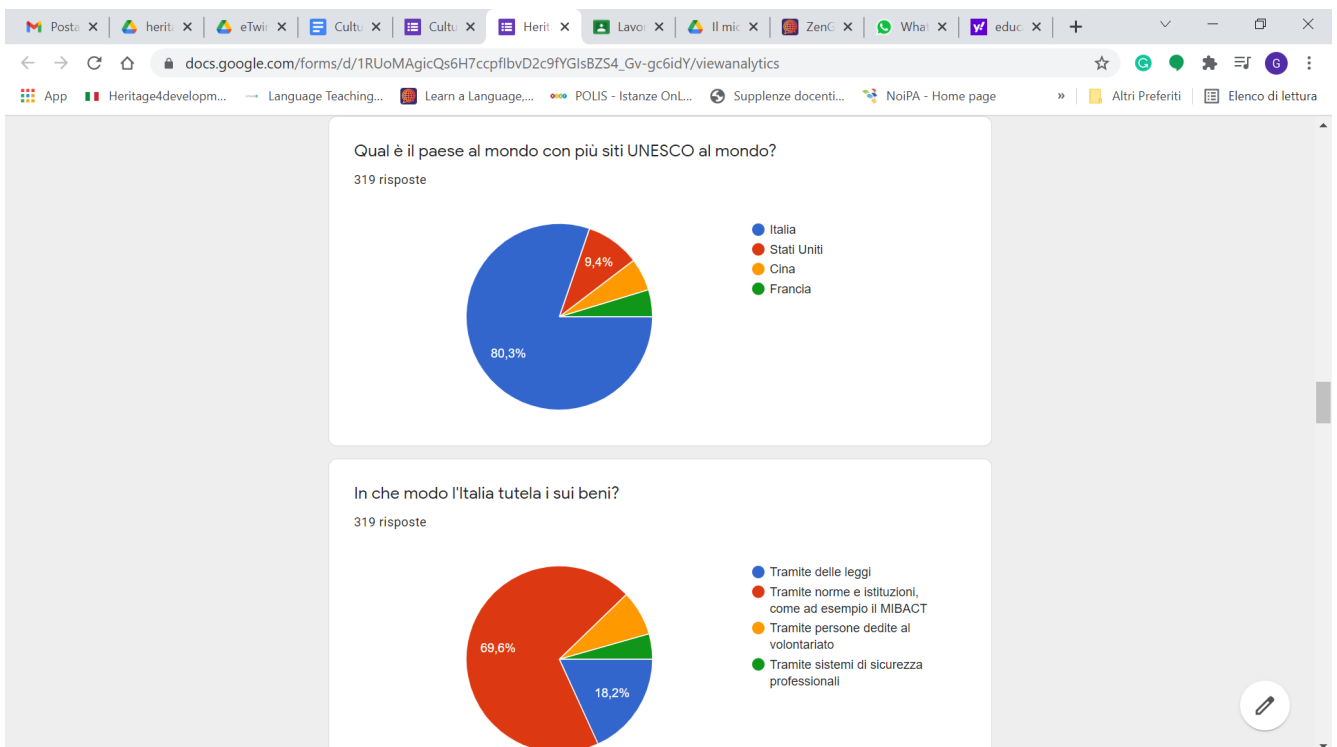

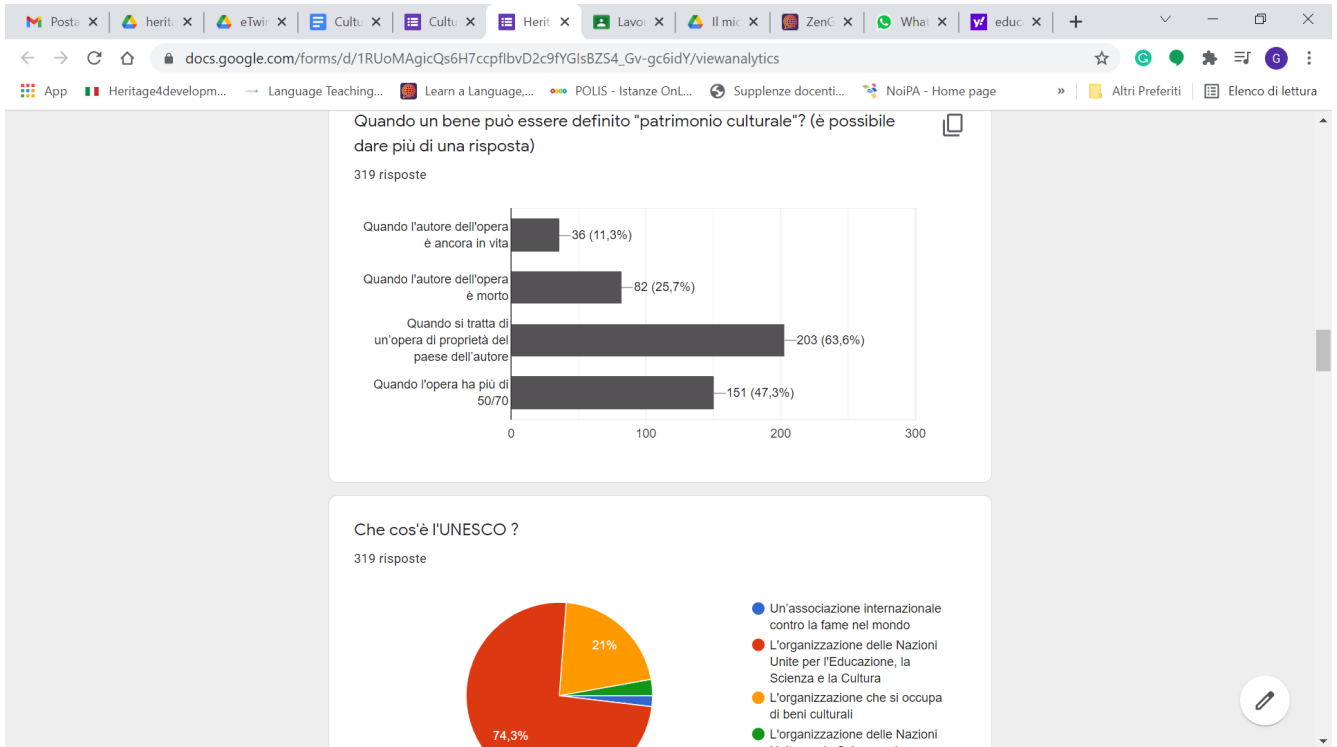

The class, divided into groups, prepared the questions to be put in a survey that was then sent out to the whole school - teachers, students, families, school personnel.

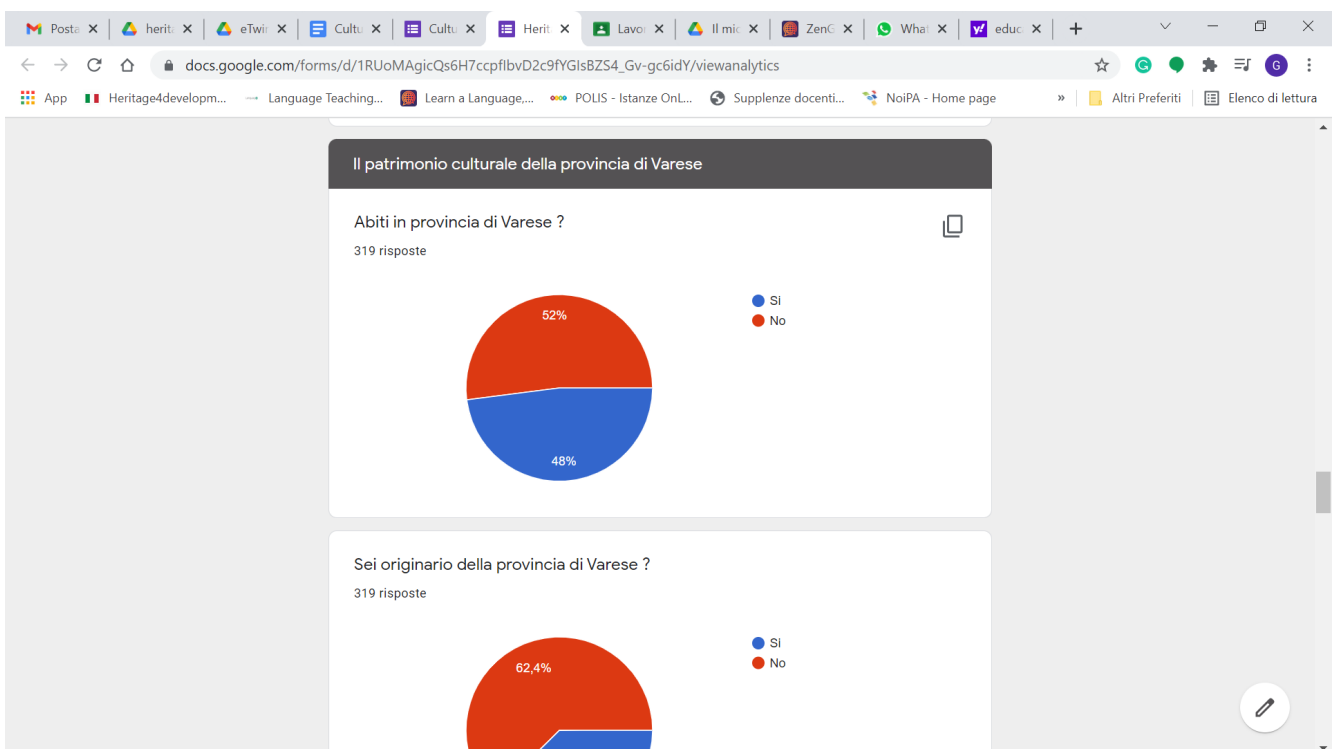

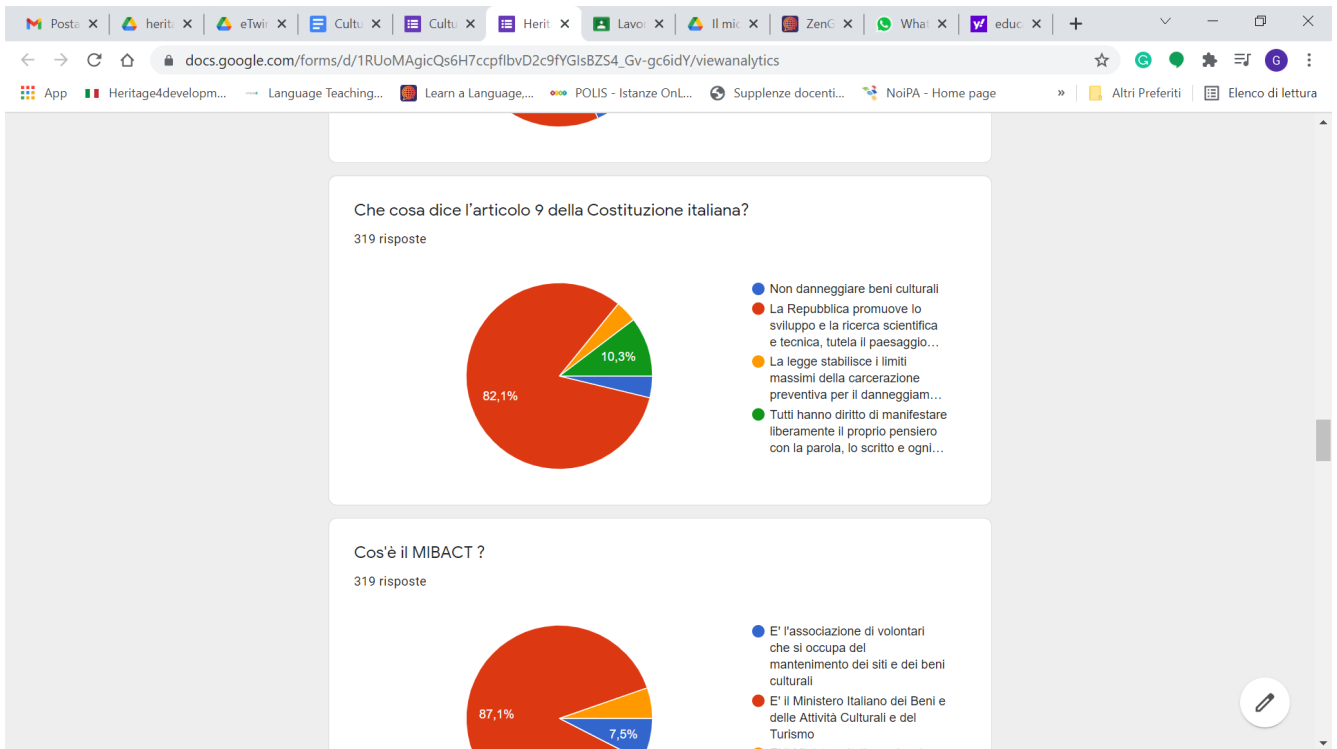

320 answers were gathered, which represent a great success for the survey, whose results were then discussed by the students.

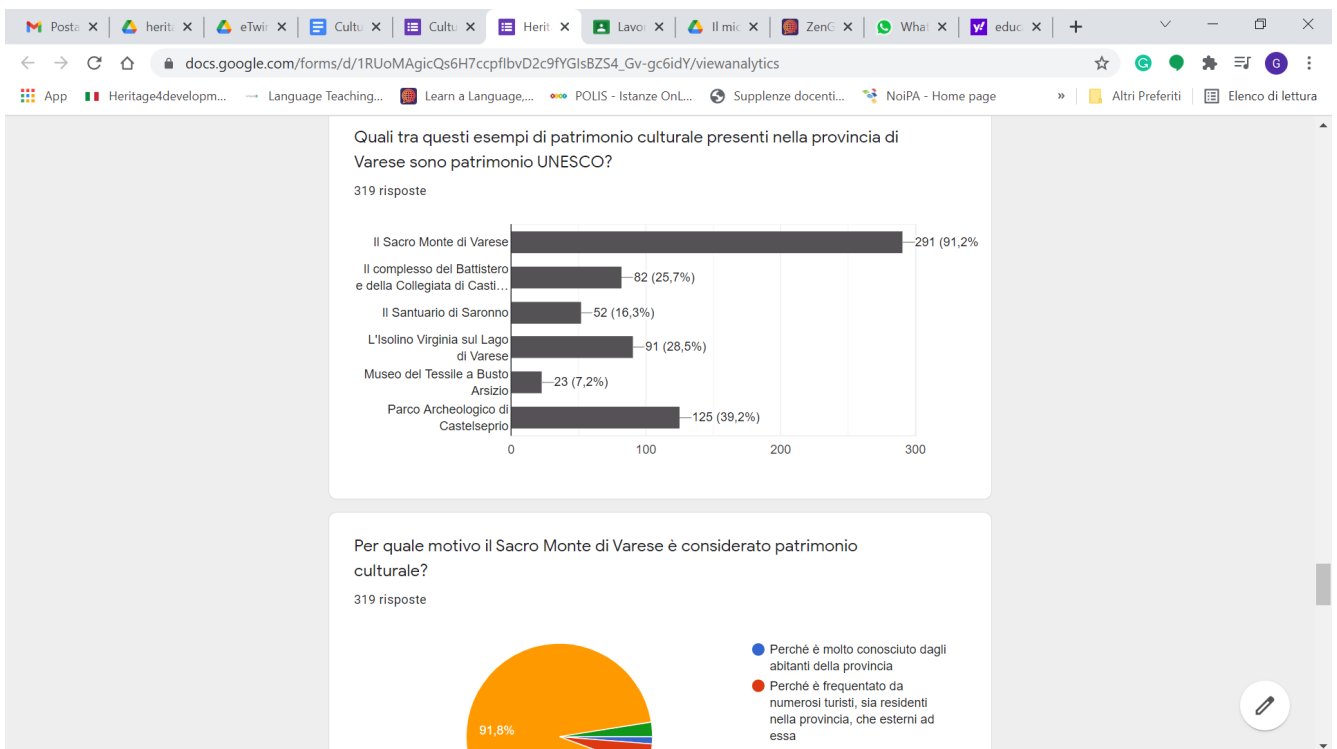

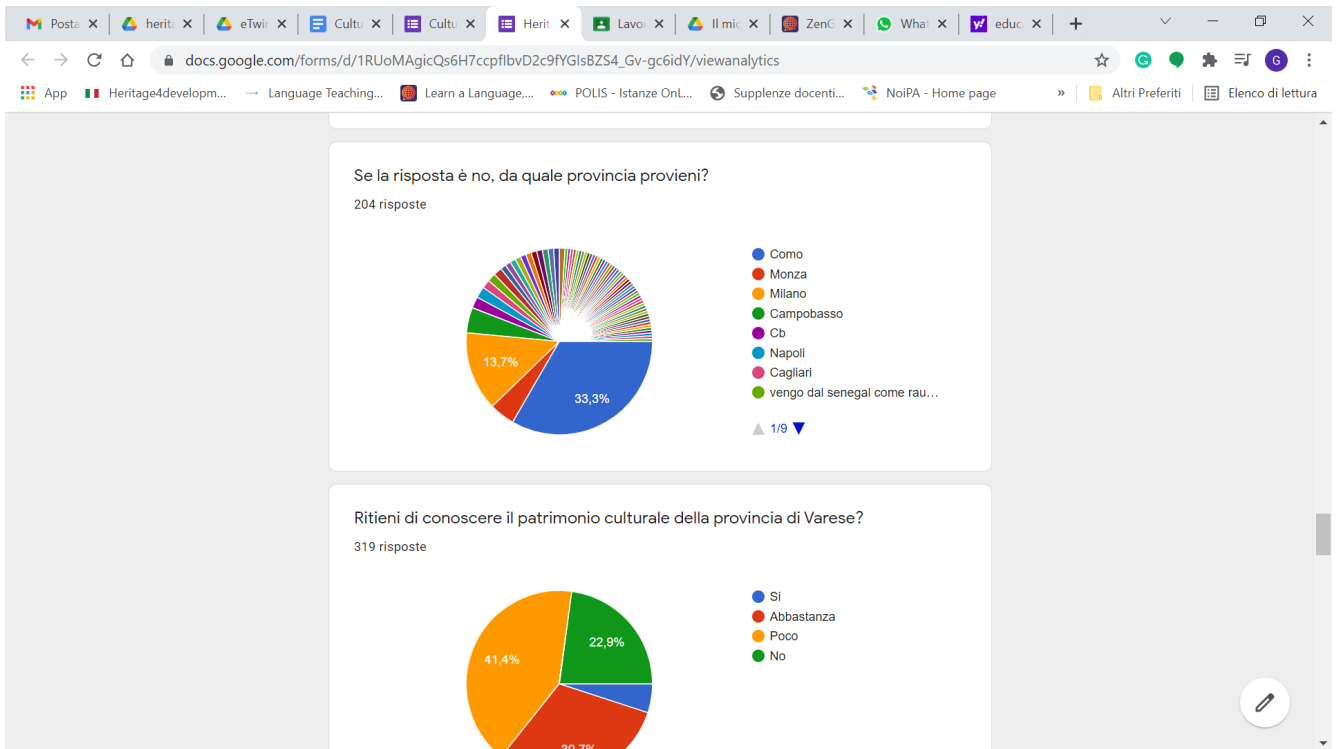

The survey is composed of 20 questions, asking about the role of cultural heritage in building a national identity and about the knowledge of heritage sites in the Province of Varese.
