Book Day 2021

Because of the celebration of Book Day on April 23rd, the groups of 1º y 2º ESO (1st and 2nd year of compulsory education) carried out an activity related to our Erasmus+ project "Heritage for development". This activity consisted of searching for literary works which are relevant in each of the partner countries involved in our project and using that information to create a presentation with the digital tool Genially.

Throughout this activity, our students have learned how to use the interactive tool genial.ly, which they will use in the following months and school years for their presentations. As teachers, we find this tool to be very useful for all kind of different subjects.

Finally, the list with all of the presentations created by our students is attached below.
