"Ljupco Santov"-N.Macedonia

# Student Participation Possibilities

- Here in our school, we really value each and every individual opinion. As such, our school youth organization actively and very often organizes meetings where, two students from every class in the school get together to represent their peers ideas.
- The president's job with the executive board is to evaluate the situation, and accordingly and democratically to organize a referendum to make the idea come to reality. In that way, every class has a spoken voice in the decision that are made in the school. Everyone is included - no exceptions.
- The activities that the youth organization organizes are numerous to say the least. They are also diverse. We like to engage and touch many different subjects across our school and local community. We have organized charity events, ranging from basketball, football and even a chess tournament!

# Student Participation Possibilities

- And as you may know, in the 21st century there is a day for every item or object or substance in the existence of mankind. We take highest pride in the regard, that we pay special attention and manage to organize most of those day! The most recent day was - tea day. We managed to make a small event in the school hall and share some loving, warm teas with our classmates!

# Student Participation Possibilities

- In addition to the many school events, there are numerous workshops and trainings, that are sponsored by various organizations and the your organization actively tries to participate in all of them. Meaning, we try to send at least one (in regards of the limit), representative to represent the school on the, in addition to learning some new skills and having an awesome experience!
- Those are all awesome things! But at the end, the most valuable thing is - **LEARNING DEMOCRACY!** By going to the meetings, and actively debating, giving ideas and our ideals on the subject, we are slowly learning how the system works, and that our word and idea **CAN** matter! Something that is desperately needed for post communist countries!

# Youth organisation activities 2019/2020
