

“Conceptual maps” OPEN LESSON (CATALINA AMENGUAL)

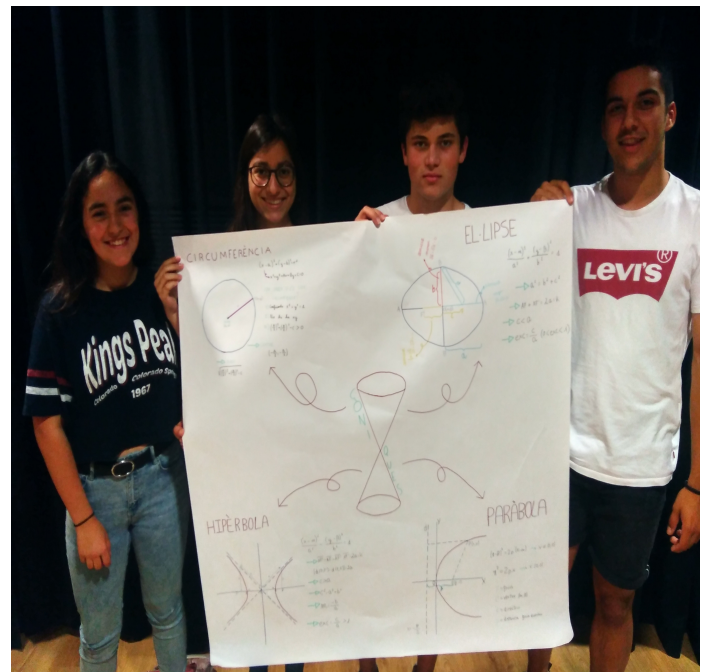

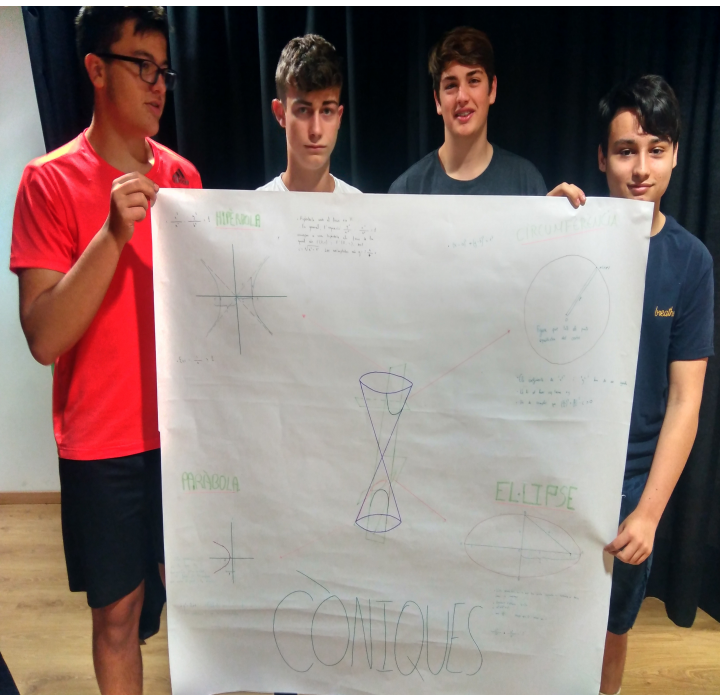

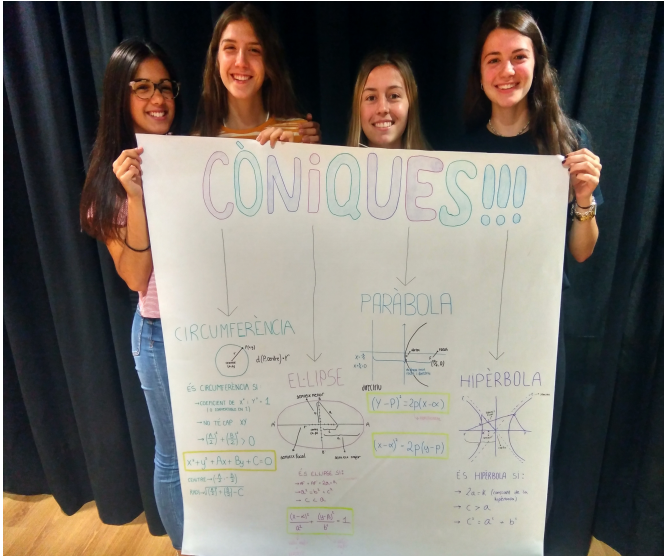

It was done on 12th of June, with students of 1st batxiller (17 years) in the mathematics class.

We went to the Assembly Hall, my students work in groups and they made a conceptual map about “Conical Figures”.

After two hours they showed their maps.

With this activity, they have learned to work in groups, they have to take decisions together. They have researched and improved mathematical concepts about conical figures.
