Website

- On the website we write about the meetings. The teachers from the hosting school write the report for the meeting and upload it on the eTwinning.
- We have to organise the official webpage, put more updates, more information about the meetings and the experiences from the students on the website.
- On every country space (subtitle: activities) we upload things we do at school. Such as reports from students, reports of meetings, video's. We upload our own photo's under our own country.
