

# Portraits of scientific women

---

## Objectives

- Learning about famous women in all the domains of science (biology, physics, chemistry, mathematics...).
  - Paying tribute to these female scientists.
- 

## Implementation

- Voluntary students carried out researches about female scientists so as to draw their portrait.
  - Students worked on Marie Curie, Rosalind Franklin, Nettie Steven, Marthe Gautier... They worked on their biography, their discovery, their award.
- 

## Results / impact

- The research have been gathered in a Padlet.
- An exhibition will be organised at the library with the portraits of the female scientists.
