The Third Primary School Čakovec, Croatia

Ivana pl. Zajca 24, 40 000 Čakovec

Croatia

KA229 Stay healthy and connected to the offline world

2019 - 2022

Poster Guideline

Each team creates 2 posters on the topic of Physical activity = more concentrated students. The exhibition will have 10 posters and a text explaining the purpose of the project and of the exhibition in particular (with the Erasmus logo).

In an artistic way posters display the assumption that students` engagement into physical activity of any kind rather than spending time on mobile devices contributes to the higher level of concentration and better performance at active learning and listening while at lessons. The posters may be created by either a group of students or an individual student. Typically posters might include both textual and graphic elements, and are designed to be both eye-catching and informative.

FORMAT

The poster is going to be printed in the following size: 70x100 cm (but it can be a little different depending on the print service).

The posters can be made by drawing, collages, photos, etc. directly in a digital format (in this case in the final size 70X100 cm and saved in a PDF format)

or

manually in a physical support (A4 or A3), and must be digitalized (scanned) to a PDF or other closed format.

The digitalization used must have enough quality to the print version: at least 175 dpi.

The host team is going to edit the final versions, adding the EU logo and the title of the project at the bottom of the poster.
