AMONG THE TEACHERS	WORKS MADE TOGETHER BEFORE, DURING AND AFTER THE MOBILITY.	
MORE MEMBERS IN TWINSPACE	MORE ACCESS AND COOPERATION IN TWINSPACE (INCREASE OF COLLABORATIVE WORKING AND MATERIALS SHARING)	

Thanks to the project a lot of positive things happened. The most important and appreciated is the higher level of cooperation among the teachers involved in the project during lockdown.

Before and after the meeting, the teachers had excellent communication and cooperation for the success and evaluation of the virtual meeting, especially unprecedented for everyone.

The cooperation of our students was greater between those of the same school and less between all schools. Unfortunately, the reason for this was distancing.

But before and after the online meeting, they collaborated in common activities on the TS of etwinning.

The families of our children expressed their regret that they did not host students from other countries and did not have the opportunity to show them the culture and civilization of Greece. The president of the parents' association conveyed the opinion of the parents in his speech at the meeting.

Children improved their social skills as well as their knowledge.

Some students also thanks to the workshops and other scientific activities gained even higher motivation to study and they prepared for and took part in different competitions on various levels and were highly awarded for that.
