

Forest products

A lot of products come from the forest, In Sweden we make saw timber and paper, we produce plywood sheets, wood pellets and more.

Co-funded by the Erasmus+ Programme of the European Union

Forest industry

History of forest industry

We have used the forest to create products for a long time, especially in the northern parts of Sweden.

Forest industry in Piteå

In Piteå we have a lot of companies that work with the forest. For example, SCA, Smurfit kappa, stenvalls. They use wood to manufacture saw timber and paper, but also to produce plywood sheets, wood pellets and more.

From plant to tree:

The most common trees in Sweden are spruce and pine. These are the steps of planting pines.

Step one: preparing the soil

Step two: planting of new trees

Step three: thinning the forest.

Step four: Clear cutting
