

Doctor

skills:

- Ability to work long hours, often under pressure.
- Good practical skills.
- Ability to solve problems.
- Effective decision-making skills.
- Leadership and management skills.
- Communication skills, compassion and a good bedside manner.
- Drive to continue learning throughout career.
- Analytical ability.

education:

- To be able to study medicine, you need the general university degree
- In order to study medicine, you need language skills in English and Latin

- To study medicine, you need a steady hand and a lot of time and patience.

experience:

- As a basis for access to the study of human medicine, you need, of course, the Abitur. Before man/woman can finally study, unfortunately some hurdles still have to be overcome
- Almost every student needs more time, as illness or a free semester come in between to prepare for the exam. Prefer to set yourself up for 7 years of study, then since you've been on the safe side.
- The study of human medicine is divided into two sections, the pre-clinic and the clinic.

languages:

- English
- Latin

training:

- You train in the studium several times a day
