

"BILDUNG"- ALL ABOUT THE WORD

Bildung- this word relates to the process of self-improvement, where philosophy and education are connected to make people more mature in their self and cultural improvement

The word "Bildung" is taken from German language, and it means education, formation, forming.

"Bildung" in my opinion is used nowadays in education - During the beginning of primary school, kids are taught the rules of Savoir-Vivre, which contains improving kids' culture. While art, music, history classes, or charity work at schools, students improve their culture and awareness. Generally, students' skills flourish and they can discover new passions.

Apart from school, I can experience "bildung" while going to theatre, dance classes, different kinds of museums. It will make me more mature about importance of my cultural improvement.
