Oh! I have some very bad comments under the video I have uploaded on youtube! So embarrassing! What should I do?

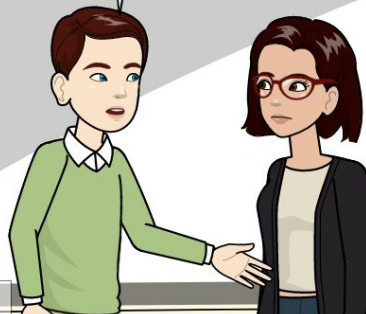

1

Ok, i will ask my teacher tomorrow at school.

2

I have a problem with one of my videos on youtube. I had very embarrassing comments. What should i do?

3

**By  
Stavros,

<https://share.pixton.com/qnjqj2a>

First, check if the comments are about you or your video. Do not respond in rush. Think!

4

If the comments are on the features of the video maybe they are right. Reply that you will think about them but ask your public to use proper, polite way for commenting

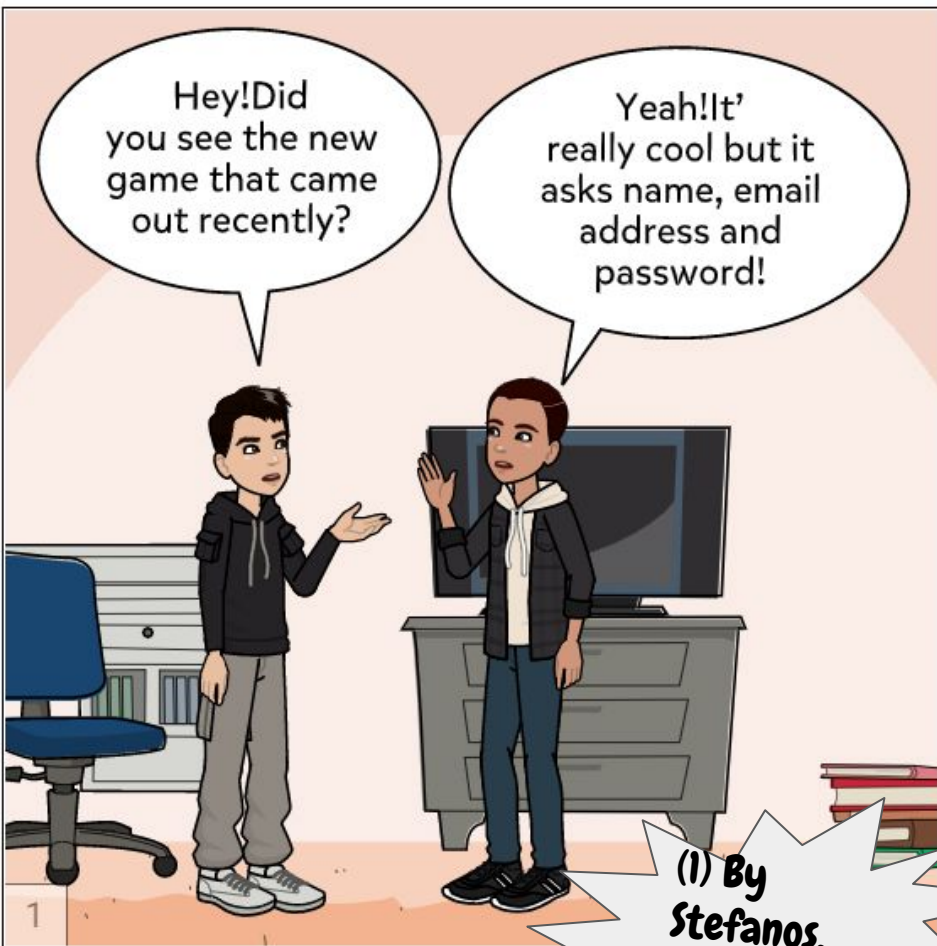

5

Very useful tips! I know now how to handle this! Thank you!

6

And remember that there is always the option to delete these comments under your video and even deactivate comments from your public.

Hey! Did you see the new game that came out recently?

Yeah! It's really cool but it asks name, email address and password!

(1) By **Stefanos, Iliou**

Wait! These are personal information. You shouldn't give them away to the web like that!

I know! I had not! Because it's really dangerous and someone could get and use them. I do not like this kind of surprise!

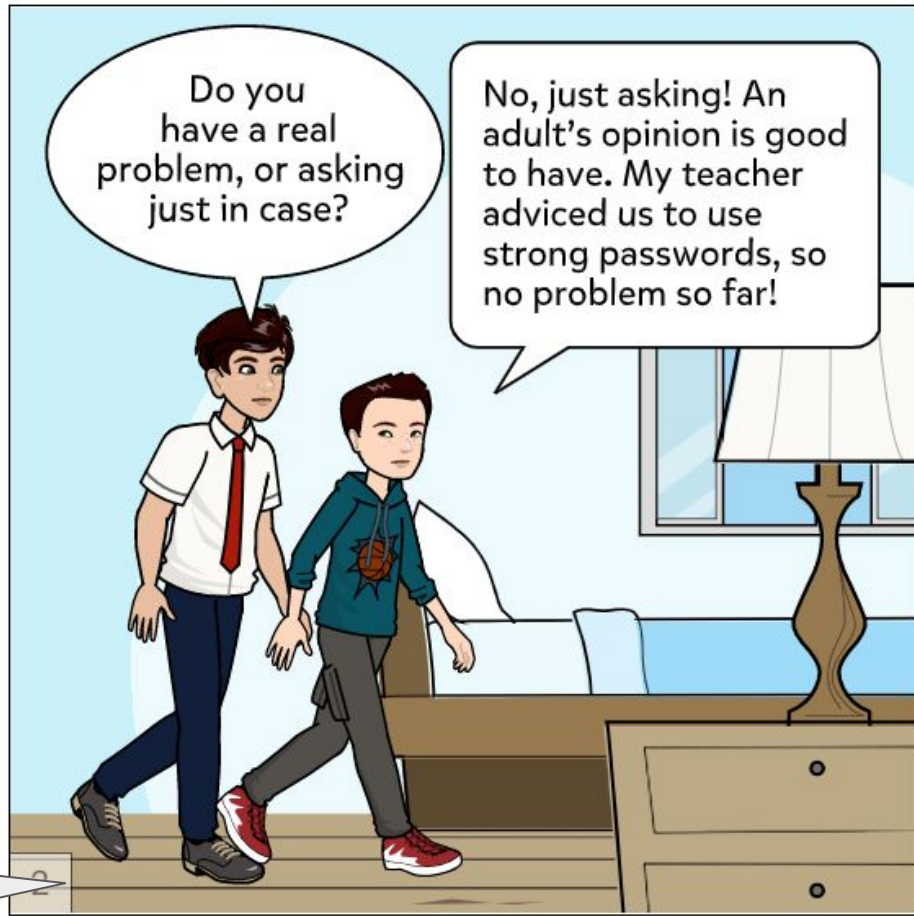

Be aware  
of your personal  
data that you share  
with the apps!

Yeah!  
Absolutely  
right!

Exactly!  
We choose our  
apps critically!

Even when you  
allow access to  
our google  
account when the  
option "login with  
Google" is used!

And of course, we do not tell our username and password to the others! We do not save our passwords on computers that are used in public!

Watching the news about COVID and i am confused. What should we do with the vaccines? Should we have the vaccine?

(1)By  
Fotis,

How can i get valid info for the vaccines? I am confused with all these posts in social media!

Better to be informed by the specialists! Check your sources! Visit official sites!

Listen to the specialists!

I know that we need to think critically! Not easy though!

All have the right to post their opinion on the web! Trust the scientists for crucial issues!

4

watching the news about  
COVID-19 and i am confused!  
Some say that there is no way  
to be protected!

My son, we follow the  
doctors' advices! They have  
the specialty and they know  
the FACTS. All the others  
are just sharing OPINIONS!

Be yourself on the web!  
Do not pretend to be  
someone different than  
real life! Be prepared and  
do not accept bullying!

This wheeling chair is not my own  
choice and before laughing at me  
think what is like being in my  
shoes! I support my identity! The  
real world is not like full of  
models like those we see in  
instagram and magazines!

So guys  
today we are  
going to talk about  
the Web.

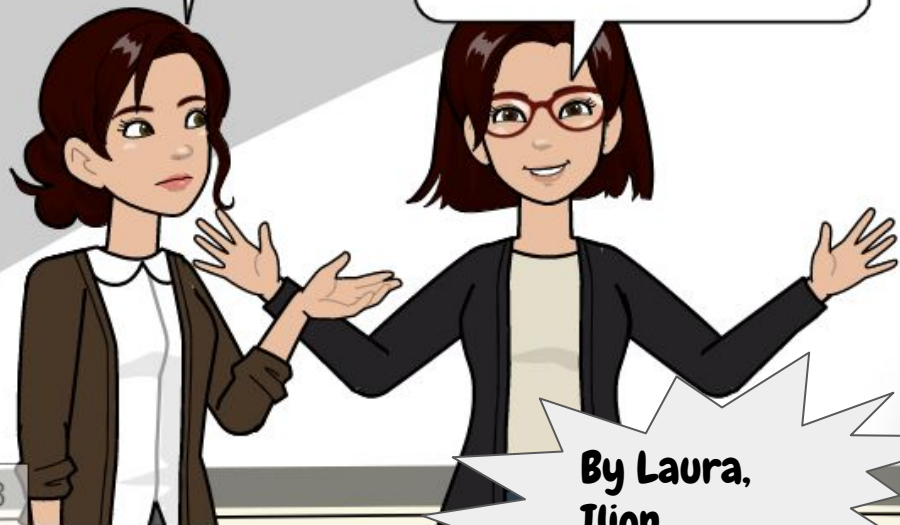

Each of you has access to the  
Net but that doesn't mean that  
we can post anything! Think  
carefully what info you reveal,  
in which of your data the  
others have access. Do not give  
sensitive personal data!

**By Laura,  
Ilion**

And listen to the experts as this lady from saferinternet4kids.g r She is a professional!

Hello! Indeed, in saferinternet4kids.g r we have created short presentations and quizzes with useful tips on the use of the web. It would be great to use this material

By Laura,  
Ilion

Also the posters there are very useful! But we can create some posters with our tips and post them at school. Lets start!

I will help you with this!

Listen to this story that a girl called on saferline to ask for help. This girl, at your age, sent a photo to her boy. It was a bold photo. The boy has sent the photo to others and then the photo was posted somewhere that everyone could see it. The girl was so scared and disappointed!

That's why we do not a)share bold photos. We think first if these photos are posted in public will that be ok? and b)of course we do not share photos of the others without asking them.

Thank you for telling us this story! So now we have some ideas for our posters.

It was great to be in your class today! I am sure that kids have more to say about a safer web.

Thank you!

Bye, kids!

People shouldn't spend an absurd amount of time watching any device with a screen in order not to harm their eyes, their bones and mainly their brain!

**By Christos,

Spending some time outside with friends is a good option, right?

Yes, really great to be outside with you! Thanks!

One more day alone at my room! I am very tired of this lockdown! And online classes again!

OK! Web is useful but real life and meeting real friends has nothing to do with online meetings! Of course i do not meet online people that i have not met before in my real life!

Today we share some tips on netiquette which is how we behave online, right?

nice to say a few

Ok, one thing we have definitely learned is that we do not upload photos with our friends without asking them first

Of course! Because we need to respect their privacy and their decision to not reveal their personal photos even if they look great.

By  
Konstantinos,  
Ilion

Continue ->

Also, we avoid to post that we are not home or to post our location

Of course! It's like telling the others "Nobody at home now! Would we had a poster outside our home saying that?"

Happy Safe internet Use 2021!

Great tips! Thank you!

By Konstantinos, Ilion

Lets share some tips we have learned!

OK! A few only! Our class should try the quizzes we had in <https://saferinternet4kids.gr>

Sure! One thing i remeber is that we should not upload photos and say where we are!

Of course! It is like posting a huge poster outside our home saying "Hey, guys! I am not here! Nobody at home!" Could you imagine that?

Chrysoula,
