Waste Management Methods In Greece

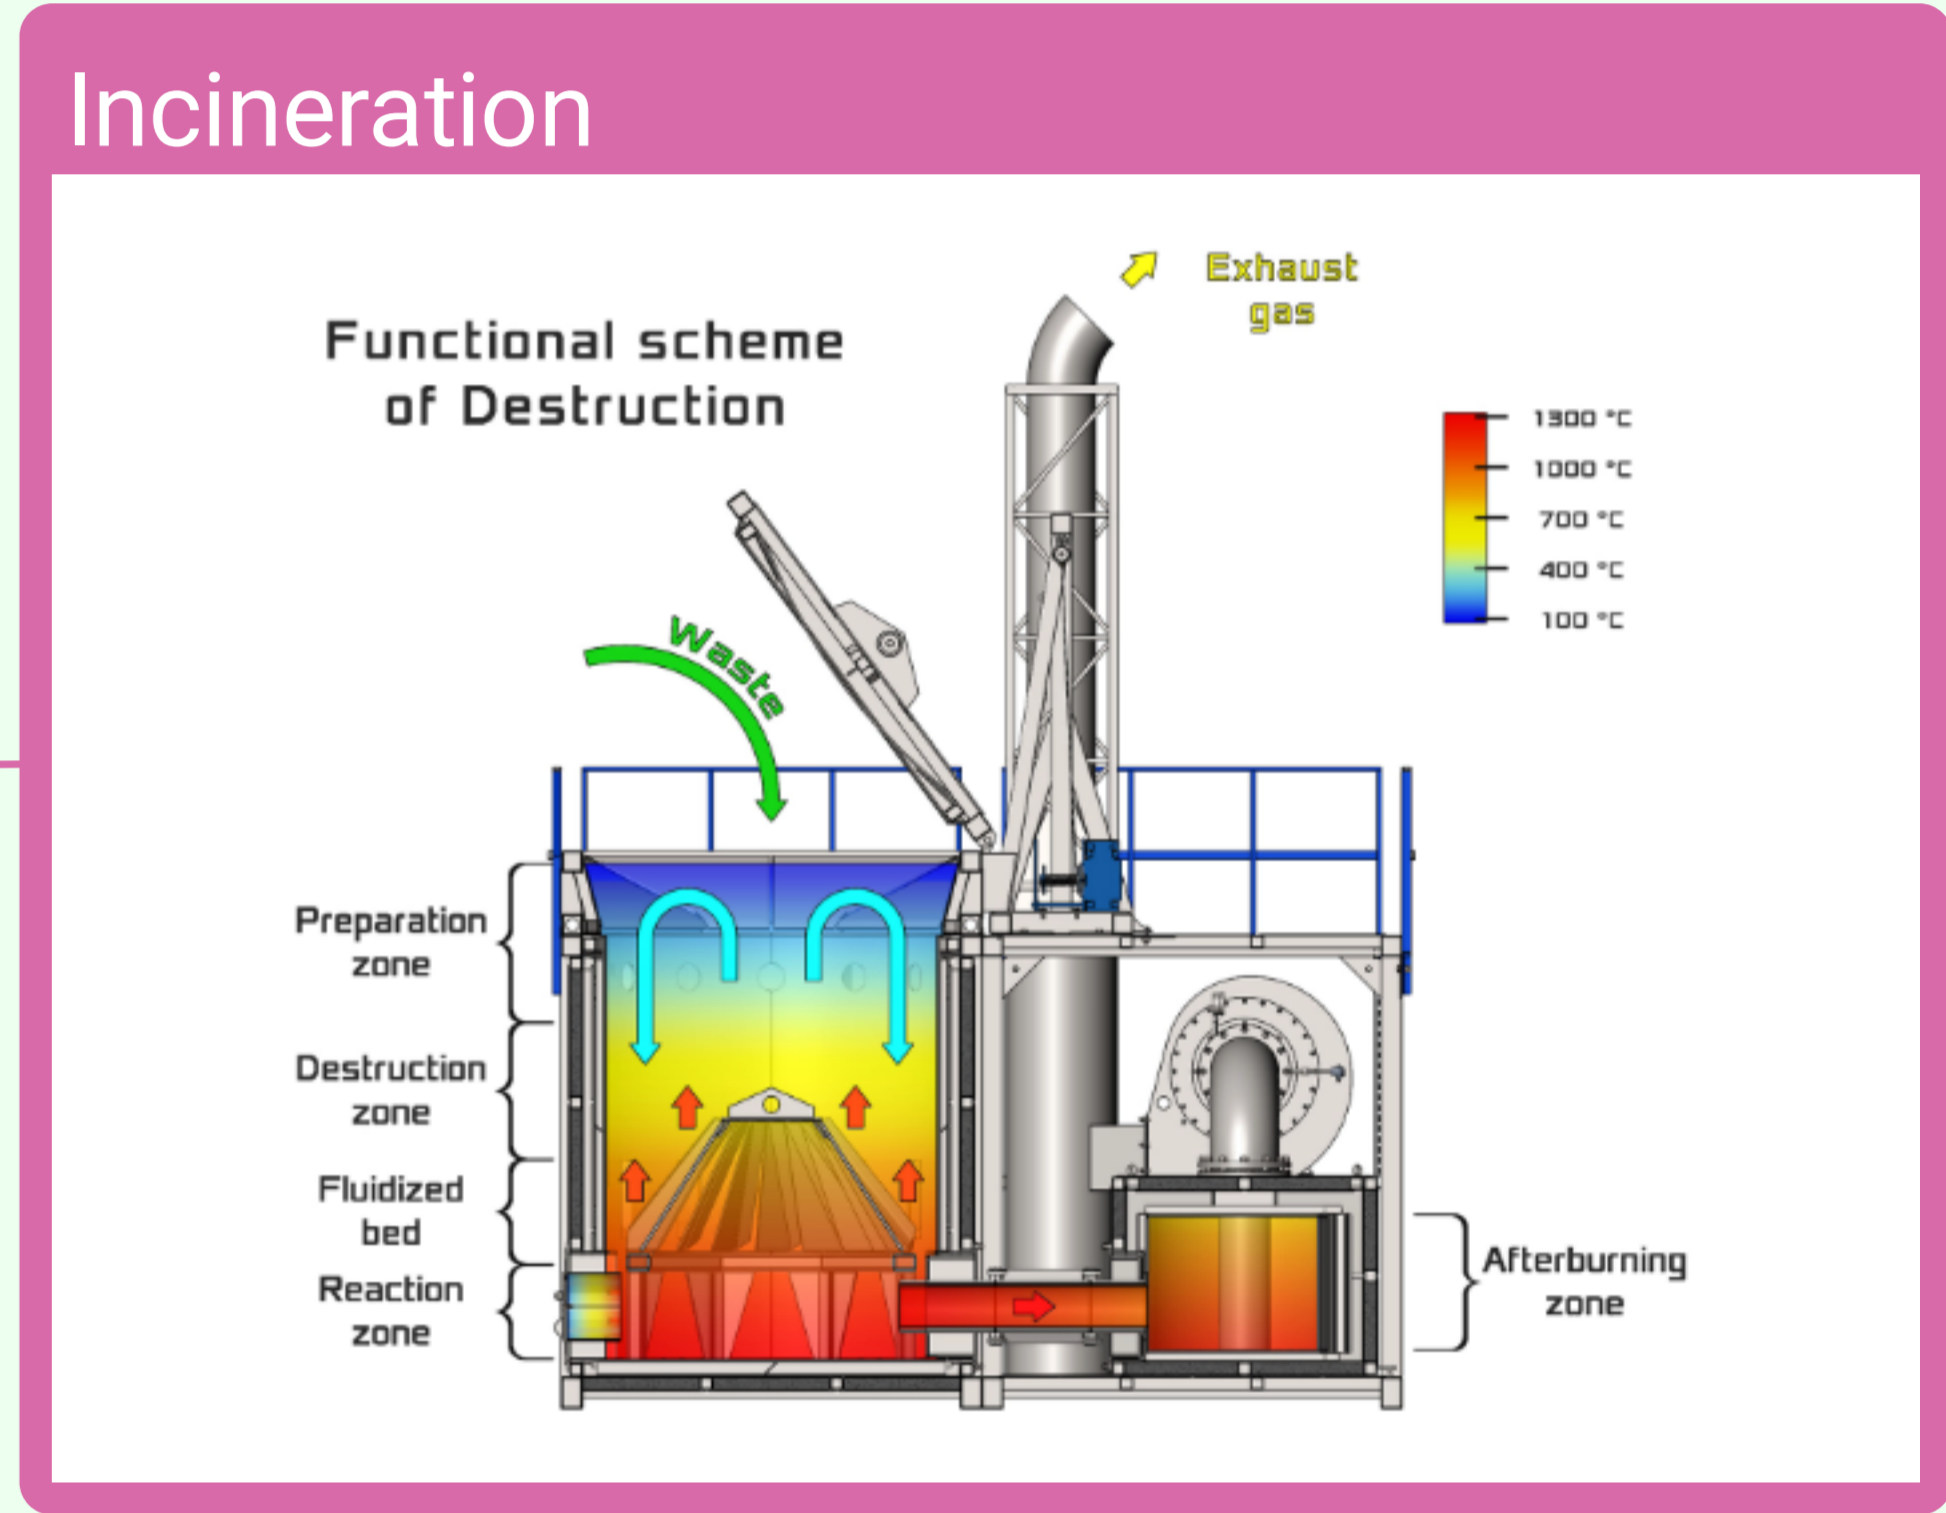

1 Compost

Compost is a mixture of ingredients used to fertilize and improve the soil. It is commonly prepared by decomposing plant and food waste and recycling organic materials.

2 Incineration

Incineration is a waste treatment process that involves the combustion of substances contained in waste materials.

3 Recycling

Recycling is the process of converting waste materials into new materials and objects.

Landfill

A landfill site, also known as a tip, dump, rubbish dump, garbage dump is a site for the disposal of waste materials.
