

MATH'S **PROBLEM!**

Ellen earns 137.40€ per week and after 4 weeks she gets an extra payment of 24.75€.

She spends 354.60€ in this period.

How much has she saved?

Alejandro Ramírez Perera

Solution:

$$137.40 * 4 = 549.6\text{€}$$

$$549.6 + 24.75 = 574.35\text{€}$$

$$574.35 - 354.60 = \underline{\underline{\mathbf{219.75\text{€}}}}$$
