

FALL IN THE SCHOOL LA QUINTA

As every year, all students in the school have celebrated our autumn holiday on November 6, 2015

All school teachers have worked and prepared various activities related to the five senses

Taste

In the taste we went to the kitchen and there we were looking at different foods classified in fruits and fleshy.

The teachers taught us the food she had worked in class, touched, smelled and tried the ...

This is one of the workshops that we like !!

This year we continue to work this fall. For that we have focused on different typical foods we can eat this station:

Smell

In the workshop of smell went to the greenhouse, we were working there the difference between pleasant and unpleasant odors.

Then we smelled plants we have in our school: rosemary and lavender and teachers proposed that we create our own odor bag to take it home and it can be put into our closet or car freshener in our parents.

We loved how good it smelled !!

Ear

To work the sense of sight we went to the staff room. There were going to work through play "word of mouth" for which we made two groups. It consists of a donut with the twenty-seven letters of our alphabet. We listened and we had a definition guess the word that started with that letter or contains.

If the letter is hit it turns green and it is a fault and turns red.

We laugh a lot

Sight

To work the view we went to the library and work there a story through the whiteboard where we do different activities that teachers had prepared us. It was fun

*We love to celebrate every year the
feast of Autumn in our school
We invite you to celebrate with us*
