

Mission4stars

eTwinning project

Project partners

Tadeusz Kościuszko Primary School
in Gębice, Poland
Col·legi Sant Josep Primary School
in Navas, Catalonia

What is etwinning?

eTwinning is an EU program which promotes collaboration between schools from different countries in Europe through the use of ICT technology. It gives opportunities to communicate, develop interests, improve language skills and share projects on a special platform called TwinSpace. This program helps integrate European Countries in a way that is accessible to everyone

What is this project about?

Mission4stars is a story of little Moon who land on the planet Earth after a huge asteroid explosion. He has been sent to a special mission to rebuild the European Union stars which were lost during the terrifying detonation. This is the only way the save humans partnership.

What is the aim of this project?

This project is dedicated to all people who want to make our society be aware of the need for integration between members of UE countries.

The need of integration

It doesn't
matter if you
are a child or
an adult,
it doesn't
matter if you
live in Europe
or Africa,
it doesn't
matter if you
are rich or
poor

We believe that
every human being
feels the need of
integration with
other people,
owns the same
rights in the society
and
has his own ideas
how to build the
happiness
